

User Interface

Using ForkLift will come very easily, if you are used to Finder, everything will look familiar, and all the extra functionality will work as you expect it. ForkLift's user interface has got highly modular by now. You can have it anyways, from a minimal single pane look to the pedal-to-the-metal 3 ton engineering monster it can become, depending on what you need at the moment.

Main Panes

The main panes display the item lists for your current location. You can always see your current location in the path bar sitting on top of each main pane. When both panes are visible, the active pane is shown by a blue highlighted path bar. The color of the path bar and the selection can be changed at System Preferences > General > Highlight color.

Path Bar

The path bar is displayed at the top of each main pane and shows the path of your current location. You can click the items in the bar to quickly navigate up in your filesystem. The path bar also supports drag and drop.
