## Solidification And Crystallization:

**Solidification and Crystallization Processing in Metals and Alloys** Hasse Fredriksson, Ulla Åkerlind, 2012-08-13  
Solidification and Crystallization Processing in Metals and Alloys Hasse Fredriksson KTH Royal Institute of Technology Stockholm Sweden Ulla Åkerlind University of Stockholm Sweden Solidification or crystallization occurs when atoms are transformed from the disordered liquid state to the more ordered solid state and is fundamental to metals processing Conceived as a companion volume to the earlier works *Materials Processing during Casting* 2006 and *Physics of Functional Materials* 2008 this book analyzes solidification and crystallization processes in depth Starting from the thermodynamic point of view it gives a complete description taking into account kinetics and mass transfer down to the final structure Importantly the book shows the relationship between the theory and the experimental results Topics covered include Fundamentals of thermodynamics Properties of interfaces Nucleation Crystal growth in vapours liquids and melts Heat transport during solidification processes Solidification structures faceted dendritic eutectic and peritectic Metallic glasses and amorphous alloy melts Solidification and Crystallization Processing in Metals and Alloys features many solved examples in the text and exercises with answers for students Intended for Masters and PhD students as well as researchers in Materials Science Engineering Chemistry and Metallurgy it is also a valuable resource for engineers in industry Solidification and Crystallization Dieter M. Herlach, 2006-03-06 Current interest in research of solidification of melts is focussed to understand crystal nucleation and crystal growth They determine the solidified product with its physical properties A detailed description of these processes lead to the development and validation of physical models which may form the basis of quantitative modelling of solidification routes in e.g casting and foundry processes in order to develop a predictive capability in the design of materials during solidification This book based on a symposium held at EUROMAT 2003 aims to give an overview on current developments in the research of solidification and crystallisation of liquids The materials of interest range from metals and their alloys over semiconductors and isolators to organic substances **Aluminium alloys of high quality** Instytut Inżynierii Materiałowej i Techniki Bezpieczeństwa, 1996 *Crystallization and Solidification Properties of Lipids* Neil Widlak, Richard W. Hartel, Suresh Narine, 2001 Annotation The crystallization and solidification properties of lipids influence their functional properties in biological systems foods personal care products pharmaceuticals and oleo chemicals To help its members and others optimize products or systems containing lipids the American Oil Chemists Society devoted its 2000 conference held in Toronto to the fundamental principles of lipid crystallization The resulting 20 papers discuss phase behavior and polymorphism lipid crystallization kinetics microstructure and rheology and crystallization in emulsions They also consider applications to dairy systems manufacturing chocolate confection and the texture of fats Annotation c Book News Inc Portland OR booknews.com *Principles of Solidification* B.
