Teaching Maths To Pupils With Different Learning Styles:

Teaching Maths to Pupils with Different Learning Styles Tandi Clausen-May, 2005-11-05 Tackles an area of the curriculum many teachers lack confidence in Lots of good starting points Spans a lot of material and is strong on diverse learning styles Clear explanation and good visual layout very innovative in approach Judging Panel for NASEN TES Book Award The book is rich in lively teaching suggestions and in insights into the impact of different forms of explanation Debate C carries us away from narrow views of ability and special needs and into the consideration of difference The author takes us through lively discussions of many aspects of mathematics learning Each section offers learning and teaching ideas involving visual and kinaesthetic approaches The book is a compendium of sound ideas rather than a collection of startlingly new approaches But throughout it has the great strength of being exceptionally clear in its arguments descriptions and drawings The design is generally helpful with plenty of illustrations as befits the book s message There are handy pages of photocopiable resources This is a lively and often passionate account of ways of ensuring that multi sensory approaches infect mathematics learning As the author says pictures in the mind can help all pupils We might add They help all teachers too TES Extra for Special Needs If you have found pupils struggling to understand some aspects of mathematics at any age then this book is for you It is a very readable book that would interest all those who work in classrooms whether as a teacher or support worker with all ages and abilities for those who work with older pupils as it gives possible approaches to use with those for whom basic skills are weak or have difficulty in understanding some of the concepts required of GCSE examinations Alison Parish Second in Mathematics Department Stowmarket High School Suffolk Read the full review as posted on the Association of Teachers of Mathematics website It is a highly practical book One strength is the way that it develops a topic from the very basics through to the harder concepts There are a large number of activities that are ready to run but these really are just a starting point for teachers to begin thinking about teaching topics in a different way and from these teachers will be able to develop their own approach Although this book is focusing on pupils who are visual and kinaesthetic learners the great majority of learners adopt a mixture of learning styles so this approach will benefit the entire class Worth a read Maths Coordinator s File This excellent and very informative teaching resource is about teaching mathematics to pupils who have learning differences It is very practical and easy to read A really nice feature is the inclusion of photocopiable resource sheets allowing readers to try out easily the ideas suggested in the book This resource is highly recommended and will be very suitable for maths teachers in primary and secondary schools SENCOs and teaching assistants British Journal of Special Education This book is about making mathematics visible and tangible not something that just lies flat on the page Dipping into it will provide instantly usable suggestions across a variety of topics at different levels from early number concepts through to fractions and ratios algebra aspects of geometry including angles and circles and data handling When you get a chance to read it more thoroughly you will find arguments for using these approaches consideration of some of the pitfalls to

avoid and inspiration to develop different ways of helping students to achieve deep and connected understandings For any teacher who wants to provide students with opportunities for visual and kinaesthetic learning in mathematics The Australian Association of Mathematics Teachers Inc A very good book offering teachers SENCOs and teaching assistants guidelines strategies and practical activities to access the thought processes of pupils with different learning styles It has an easy to read format giving suggestions rather than dictat on the use of models to think and is a unique document for those who have input into the furthering of the teaching and learning of mathematics Mathematics in School How can you make maths exciting and meaningful for all your pupils Some pupils find even basic concepts in mathematics difficult to grasp and it can be a challenge to make lessons accessible to all This book offers practising teachers a range of approaches to making maths clear for struggling students It looks at the different ways in which maths can be taught so that pupils with different learning styles can be stimulated Maths is visible and tangible not something that just lies flat on the page Included are ideas to be used in lessons suggestions for exciting visual ways to teach basic concepts lots of practical advice and guidance The book shows teachers how to unlock mathematics for all their learners and it encourages the use of a variety of methods to teach the subject It provides a valuable resource for maths teachers in both primary and secondary schools for SENCOs and teaching assistants and for those delivering initial teacher training or inservice courses Tandi Clausen May is an educational researcher responsible for the development of a range of mathematics curriculum and assessment materials She delivers popular workshops on teaching mathematics around the United Kingdom She also writes regular articles on mathematics teaching for educational journals and newspapers

A PRACTICAL APPROACH TO USING LEARNING STYLES IN MATH INSTRUCTION Ruby Bostick Midkiff, Rebecca Davis Thomasson, 1994-01-01 Although much attention has been given to the use of learning styles in the general curriculum and in teaching students to read the use of learning styles based instruction in the mathematics classroom has received limited attention Therefore the purpose of this book is to address the improvement of mathematics instruction through the use of learning styles based instruction Its goals are to give the reader an understanding of learning styles based instruction in mathematics of effective use of manipulatives in teaching various concepts at all grade levels of ways to develop spatial reasoning skills in students of different activities which accommodate a variety of learning styles and of authentic assessment in mathematics The book presents the use of learning styles based instruction as a powerful strategy which teachers can and should use with the result that teaching will be more effective less remediation will be necessary and the overall mathematics curriculum will be enhanced

Learning Power in Practice Ruth Deakin Crick, 2006-08-24 This book provides a variety of ideas for use in the classroom based on practical applications of the conceptual understanding of learning power It tells the reader about the Effective Lifelong Learning Inventory research programme ELLI and uses practical examples of how it can work in actual classes to explain its effectiveness Its value for practitioners working with children with SEN appears to be in the way it challenges them to look at themselves as

learners also how they can support the children they work with to become more effective learners Special Needs Coordinator s File This is not a gimmicky approach The approach here fosters deeper understanding for both the teacher and learner of exactly what the process involves It contains much to interest schoolteachers senior managers and those involved with learners of any age ESCalate Contains Learning Power flash cards What kind of learner are you How can you become a better learner This book puts the findings of the well known Effective Lifelong Learning Inventory ELLI research programme into the practical context of the classroom helping you to find answers to these questions The book offers many suggestions for practical ways to improve the learning power of all the children in your class It looks at learning power what it is and how it can be achieved creating the right classroom environment for powerful learning how learning power works in the primary and secondary school classroom how animal metaphors can be used with children to explain concepts This is an exciting read for anyone interested in how children learn and how we can help them to learn more effectively It fits in very well with the debate around such concepts as accelerated learning thinking skills and learning styles *Styles and Strategies for Teaching High School Mathematics* Edward J. Thomas, John R. Brunsting, Pam L. Warrick, 2010-08-10 This book offers effective research based strategies that can be mixed and matched to differentiate mathematics instruction for high school students through four different learning styles Learn From the Experts Sign up for a Math Professional Development Institute in your area visit www.ThoughtfulClassroom.com events *Learning to Teach Mathematics in the Secondary School* Sue Johnston-Wilder, Peter Johnston-Wilder, David Pimm, 2005-01-14 Learning to Teach Mathematics in the Secondary School covers a wide range of issues in the teaching of mathematics and gives supporting activities to students to enable them to translate theory into practice Topics covered include mathematics in the National Curriculum different teaching approaches using ICT mathematics education for pupils with special needs in mathematics assessment and public examinations teaching mathematics post 16 professional development **Styles and Strategies for Teaching Middle School Mathematics** Edward J. Thomas, John R. Brunsting, 2010-03-30 Mathematics teachers face many challenges in today s classrooms including issues such as higher standards differentiation real world applications non routine problem solving and more Here the authors explore which research based strategies are most effective for delivering math instruction **Teaching Mathematics Online: Emergent Technologies and Methodologies** Juan, Angel A., Huertas, Maria A., Trenholm, Sven, Steegmann, Cristina, 2011-08-31 This book shares theoretical and applied pedagogical models and systems used in math e learning including the use of computer supported collaborative learning which is common to most e learning practices Provided by publisher [Dyslexia and Learning Style](#) Tilly Mortimore, 2008-07-08 The second edition of this highly successful book *Dyslexia and Learning Style* builds on the latest research to extend its practical evidence based approach to learning style in the educational environment Containing a response to the most recent critical insights into style theory and new suggestions for practical work for students within a range of educational contexts this book remains essential for any

teacher wishing to use awareness of style preferences to ensure that all students are helped to succeed Recent government policy emphasises inclusive teaching for all and personalised learning This means that all teachers need to consider how they can adapt the ways in which they teach to maximise success for all learners The first section of this practical book provides an overview of the latest research into both dyslexia and learning style and how pupils should be helped to consider the ways in which they can take responsibility to make use of their style preferences to learn effectively The second section provides ways in which style preferences can be established It offers techniques to help students absorb process and create responses to information across the curriculum It suggests practical ways in which teachers can adapt material to make it accessible to a range of learners and provides activities to help students develop a more flexible approach to learning throughout their studies in school and higher education

Practical Approaches to Using Learning Styles in Higher Education Rita Dunn, Shirley A. Griggs, 2000-04-30 Annotation The first book that shows professors of higher education how to use learning style approaches in their college classrooms

Teaching Children Mathematics, 2008-08 **Constructivist Methods for Teaching in Diverse Middle-level Classrooms** Kenneth T. Henson, 2004 Constructivist Strategies for Proactive Middle Level Teachers is designed to prepare prospective middle level teachers for their first classroom experience and to help in service teachers improve their teaching skills Each of the themes in this book addresses a major goal set by the Carnegie Council on Academic Development or by the National Middle School Association particularly selected for middle level programs The book employs as its focus constructivism multiculturalism and a proactive approach to teaching all topics of concern importance to teacher educators Prospective middle level teachers

The Top Books of the Year Teaching Maths To Pupils With Different Learning Styles The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Teaching Maths To Pupils With Different Learning Styles : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens' "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
