Teaching Students with Severe Disabilities and Behavior Disorders Using Reverse Inclusion and the Arts Michael Zeroski, 2012 The foundation of inclusion is to provide a sense of belonging meaning and purpose for all students In theory the emotional social and academic needs of special education students are met by a specialized team of educators within an existing program for typically developing

children For a number of students with severe cognitive disabilities and behavior disorders this type of inclusive setting is not practical accessible or beneficial given the complexities of the students and the programs offered Furthermore there is limited research supporting the benefits of inclusion for students with severe disabilities and certain behavioral disorders which implies a need for further research and examination of inclusive programs available It is important to first describe some of the complexities which exclude some students from participating in traditional inclusive classrooms For example a student with a severe disability may have medical and daily living needs which are better monitored and controlled within a self contained special education setting This student might require the constant care and attention from a classroom nurse who administers medications monitors seizure activity and provides emergency medical assistance at a moment s notice Some of the complications may be life threatening if the proper time of response medications and positioning apparatus are not in place Therefore a student may not be safe away from his her special education setting In addition due to the lack of staffing training and environmental factors some students with behavior disorders and sensory integration needs may not have the supports required to thrive in a general education setting What recent research does suggest is that same aged general education peer support does benefit students with severe disabilities and behavior disorders A reverse inclusive classroom is one setting that provides for the benefits of peer group support while maintaining the critical environmental medical and trained staffing required for the students who are not able to thrive in a general education classroom In addition this type of classroom requires a curriculum that is easily accessible teaches preferred behaviors facilitates communication and includes social emotional and sensory motor integration so as to support the most critical needs Music movement and the arts has been researched and proven to provide all of the needs mentioned Teaching Students who are Exceptional, Diverse, and at Risk in the General Education Classroom Sharon Vaughn, Candace S. Bos, Jeanne Shay Schumm, 2007 Based on the belief that even small accommodations make a difference in the success of students with disabilities this text provides classroom teachers with the knowledge tools and practical strategies that will empower them to spark learning in every student From students with disabilities culturally diverse students and students with limited English proficiency to economically disadvantaged students Vaughn Bos Schumm provides teachers with the tools they need in their diverse classrooms Revised to reflect recent changes in the law IDEA 2004 a new chapter on Developing Independence in Learning an all new Tech Tips features that has received rave reviews a revised chapter Managing Student Behavior that emphasizes school wide behavior management and positive behavioral support an expanded chapter on Collaborating and Coordinating with Other Professionals and Family Members with increased coverage of co teaching a revised chapter on Planning and Grouping Strategies for Special Learners that reflects an increased emphasis on grouping and expanded coverage of secondary education via chapter opening interviews new photos and new examples throughout the text Tough to Reach, Tough to Teach Sylvia Rockwell, 1993-01-01 This book on students with behavior disorders is intended to serve as a resource
