## Teaching Testing And Assessment:

**Tests and Teaching Quality** National Research Council, Board on Testing and Assessment, Committee on Assessment and Teacher Quality, 2000-04-14 Improving the quality of teaching in elementary and secondary schools is now high on the nation's educational policy agenda. Policy makers at the state and federal levels have focused on initiatives designed to improve the abilities of teachers already in schools and increase the numbers of well qualified teachers available to fill current and future vacancies. Tests and Teaching Quality is an interim report of a study investigating the technical, educational, and legal issues surrounding the use of tests for licensing teachers. This report focuses on existing tests and their use.

*Classroom Assessment* W. James Popham, 2005 I have an extremely high opinion of this textbook. This is the only assessment text I have ever used that students actually read consistently. Students frequently comment about their enjoyment of the text and their appreciation for the humor injected throughout the chapters. Marcy Blackburn, Cameron University. The topics are presented very clearly, are very well organized, and are sufficiently comprehensive for pre-service teachers. Brian C. McKeivitt, Iowa State University. Written in Jim Popham's characteristic witty style, the Fourth Edition of *Classroom Assessment* addresses the range of assessments that teachers are likely to use in their classrooms. The forces of accountability have changed educational assessment, and this new edition now addresses the central issue of how classroom assessment can effectively benefit students when carried out in the context of accountability tests. New legislation such as the No Child Left Behind Act (NCLB) and issues such as state standards that directly impact classroom testing and teaching are discussed to present readers with a series of practical action options. In addition, the text continues to analyze more traditional topics such as validity and reliability and discusses the alternative assessments used in today's classrooms.
