Nia, 2020-08-01 This book provided for the students of architecture interior design and civil engineering with an essential information needed to illustrate the technical drawings of any object or building Therefore this book developed a practical handbook for the first year students to be familiar with the alphabetic of technical drawings t

describes the range of graphic tools techniques and conventions that are required in technical and architectural drawings. The collected information is the authors years experience of teaching in this field. All the required information have been collected and edited in a way to have a comprehensive handbook to be applicable in one academic semester. In this regard it might be a good textbook for the instructors who are mostly dealing with the first year students to teach them the alphabetic of technical drawing. The content of this book and its chapters classified and developed in which instructors will be able to apply the topics weekly during one academic semester. In each chapter there are some classwork and homework for the students. Since this book has been developed based on European Credits Transfer System ECTS for one academic semester instructors may follow the proposed sequence of this book in view of that the objectives of this book are To familiarize students with the basic architectural drawing techniques equipment and applications To develop students ability in using drawing tools and techniques To introduce the basic principles of drawing To begin with the basic drawing exercises and continue with more complex studies To understand different properties of three dimensional objects and draw the orthographic projection To introduce the concept of scale and dimension To become familiar with the concept of scale and dimensioning by considering line types and line weights
