Undesigning The Bath:

Undesigning the Bath Leonard Koren, 2024 Blunk Books has reissued *Undesigning the Bath* in collaboration with the original author Leonard Koren. In the quarter century since its publication and long since out of print, *Undesigning the Bath* has accrued a devoted following amongst designers and artists. The book presented a novel idea coming from an artist and designer that design is in some fundamental ways antithetical to the essential bathing experience. It was the culmination of a many decade interest of Koren's who created bath related events, unusual bathing environments and paper works about bathing including the avant garde WET The Magazine of Gourmet Bathing from 1976-81. publisher summary [The Architecture of Bathing](#) Christie Pearson, 2020-10-06 A celebration of communal bathing swimming pools saunas beaches ritual baths sweat lodges and more viewed through the lens of architecture and landscape. We enter the public pool the sauna or the beach with a heightened awareness of our bodies and the bodies of others. The phenomenology of bathing opens all of our senses toward the physical world entwined with the social while the history of bathing is one of shared space in both natural and built environments. In *The Architecture of Bathing* Christie Pearson offers a unique examination of communal bathing and its history from the perspective of architecture and landscape. Engagingly written and richly illustrated with more than 260 illustrations many in color. *The Architecture of Bathing* offers a celebration of spaces in which public and private sacred and profane ritual and habitual pure and impure nature and culture commingle. Pearson takes a wide ranging view of her subject drawing on architecture art and literary works. Each chapter is structured around an architectural typology and explores an accompanying theme for example tub sensuality river flow waterfall rejuvenation and banya immersion. Offering examples introducing relevant theory and recounting personal experiences Pearson effortlessly combines a practitioner's zest with astonishing erudition. As she examines these forms we see that they are inextricable from landscapes bodily practices and cultural production. Looking more closely we experience architecture itself as an immersive material and social space embedded in the interdependent environmental and cultural fabric of our world. *Thirteen Books* Leonard Koren, 2001 An author and book designer offers a candid look at his own creations. **The Art of the Bath** Susannah Marriott, 2004 For many people a soothing bath can solve or at least ease a huge amount of worries, ills or complaints. Its invigorating nature is used the world over to calm troubles or as a place to retreat to escape the hassles of everyday life. This tranquil little book is split into two parts firstly looking at everything you could possibly need to make the perfect bath ranging from candles and incense oils and essential oils and towels to loofahs and body brushes music reading matter and drinks. Part two concentrates on luxurious home bathing providing recipes tips and treats. Scattered throughout are snippets of history lore and culture gathered from bathing traditions the world over plus evocative quotes and wonderful images to accentuate the wonderfully restorative quality of the bath. **Materials and Meaning in Architecture** Nathaniel Coleman, 2020-02-20 Interweaving architecture philosophy and cultural history. *Materials and Meaning in*

Architecture develops a rich and multi dimensional exploration of materials and materiality in an age when architectural practice seems otherwise preoccupied with image and visual representation Arguing that architecture is primarily experienced by the whole body rather than chiefly with the eyes this broad ranging study shows how the most engaging built works are as tactile as they are sensuous communicating directly with the bodily senses especially touch It explores the theme of material imagination and the power of establishing place identity in an architect s work to consider the enduring expressive possibilities of material use in architecture The book s chapters can be dipped into each individual chapter providing close readings of built works by selected modern masters Scarpa Zumthor Williams and Tsien insights into key texts and theories Ruskin Loos Bachelard or short cultural histories of materials wood brick concrete steel and glass And yet taken together the chapters build to a powerful book length argument about how meaning accrues to materials through time and about the need to reinsert the bodily experience of materiality into architectural design It is thus also in part a manifesto arguing for architecture to act as a bulwark against the tide of an increasingly depersonalised built environment With insights for a wide range of readers ranging from students through to researchers and professional designers *Materials and Meaning in Architecture* will cause theorists to rethink their assumptions and designers to see new potential for their projects
