Teaching Concepts:

Teaching Concepts M. David Merrill, Robert D. Tennyson, Larry O. Posey, 1992 **Basic Concepts of Teaching** Asahel Davis Woodruff, 1961 The approach to teaching described in this book is based on a deliberate and critical selection of things a teacher should know and be able to do in order to teach students in school The approach is practical and operational A series of principles are stated and distilled and their best use will occur when the student has had some practical teaching experience and turns to the task of analyzing their classroom performance **Concept Cat: Teaching Concepts in the Early Years** Anna Branagan, Stephen Parsons, 2025-05-30 Conceptual vocabulary shapes children's thinking in the Early Years and forms the foundation for later mathematical and scientific learning However these words are abstract and often tricky to learn and to teach Concept Cat is a tried and tested evidence based approach that supports all young children's learning of conceptual vocabulary Vocabulary is taught in a structured and engaging manner with explicit teaching of vocabulary followed by implicit teaching in play based learning The resource provides A step by step guide to teaching 150 different concepts using songs stories and play based activities A whole class approach which is accessible for a wide range of children including those with limited language Guidance and resources for working with families to effectively support children's learning Accompanying downloadable resources including printable symbols of each concept for immediate use in the classroom Concept Cat is a complete guide to implementing this approach and an essential resource for Early Years educators primary teachers and speech and language therapists All you need is a cat toy to get you started **Changing Concepts in the Teaching of History** Ruth Isabella Higley, 1928 **The Profession of Teaching** Oscar Israel Woodley, Myra Virginia Soper Woodley, Myra Virginia Woodley, 1917 **Examples of Teaching Concepts Using Precise Textual Explanations** Dr. Matthew Yip, **A Digest of Investigations in the Teaching of Science** Francis Day Curtis, 1926 **Bibliography of Scientific and Industrial Reports**, 1965-07 **U.S. Government Research & Development Reports**, 1965 *A Study of Concept Development in the Eighth and Twelfth Grade* Mary Minnie Webber, 1930 **Syllabus of a Course in Pedagogy Embracing Educational Psychology, Methods of Teaching, School Economy, and History of Education** Edward Brooks, 1892 *On the Province of Methods of Teaching* James Harmon Hoose, 1879 **Systematic Science Teaching** Edward Gardiner Howe, 1894 This work advances a recommended course of teaching science along side other subjects for elementary students The main organization structure is the Stars and Earth Minerals and rocks plants and animals *The Ohio Educational Monthly*, 1885 **The Essentials of Teaching** Thomas J. Burnett, 1916 **Bulletin** Kansas Association of Teachers of Mathematics, 1927 **Principles and Methods of Teaching Arithmetic** James Robert Overman, 1920 **Teaching and Learning Elementary Social Studies** Arthur K. Ellis, 1986 **The Psychology of Teaching** Albert Allison Farley, 1929 **The Theory of Teaching and Elementary Psychology** Albert Salisbury, 1905 This treatise if such it may be called is professedly of a rudimentary character it is

designed for beginners in the study of educational psychology and pedagogy Its purpose is only to lay a foundation for such study to open up the subject and give the student the necessary tools for working the field of pedagogical thought For nearly twenty years the writer has taken in hand twice in each year a class of pupils in the second year of the normal school course with this purpose of inducting them into the elements of pedagogical theory Finding no text book in existence suitable to his view of such an undertaking he was compelled to give the instruction in an oral Socratic conversational manner using books only for occasional reference The time has now come as it seems to him for reducing this work to written form with a view to economizing the time of future pupils and in the hope that it may serve a useful purpose to young teachers in their daily work or as members of circles for professional reading and study The peculiar form and arrangement given to the matter of this book are thus the outgrowth of long experience and direct contact with students as yet unused to introspection or to abstract thought The writer as a teacher has sought continually to find the natural methods of approach and the natural lines of progress in the development of a pedagogical attitude of mind without too much regard to traditional modes and yet with a careful avoidance of eccentricity or intentional novelty Clearness and conciseness have been a constant aim It is believed that the book is well suited as a text book in either theory of teaching or elementary psychology Preface PsycINFO Database Record c 2013 APA all rights reserved
