the exception of Clausewitz no reflective thinker has seriously engaged with the concept of war with its persistent
changeability and the dominant direction of its changes The results of this failure are seen in the extreme logical weakness of
most debates during the last two centuries on the possibility of eliminating war and since 1945 on the possibility of
eliminating nuclear weapons Orderly clear and reflective *Understanding War* develops two main theses first that the
horrendous escalation of war s destructiveness in this century is primarily the result of the inherently cumulative character
of war itself rather than of the application to war of recent science based technologies and second that the irreversible
destructiveness of nuclear weapons suggests how joint action by the superpowers could prevent their being used in any
future war
