Unicorn U:

Fragments Shalom Lappin, Elabbas Benmamoun, 1999 This volume contains essays on ellipsis the omission of understood words from a sentence and the closely related phenomena of gapping This volume presents work by leading researchers on syntactic semantic and computational aspects of ellipsis The chapters bring together a variety of theoretical perspectives and examine a range of cross linguistic phenomena involving ellipsis in Japanese Arabic Hebrew and in English This volume will be of interest to syntacticians semanticists computational linguists and cognitive scientists

Philosophy, Language, and Artificial Intelligence J. Kulas, J.H. Fetzer, T.L. Rankin, 2012-12-06 This series will include monographs and collections of studies devoted to the investigation and exploration of knowledge information and data processing systems of all kinds no matter whether human other animal or machine Its scope is intended to span the full range of interests from classical problems in the philosophy of mind and philosophical psychology through issues in cognitive psychology and socio biology concerning the mental capabilities of other species to ideas related to artificial intelligence and computer science While primary emphasis will be placed upon theoretical conceptual and epistemological aspects of these problems and domains empirical experimental and methodological studies will also appear from time to time Among the most challenging and difficult projects within the scope of artificial intelligence is the development and implementation of computer programs suitable for processing natural language Our purpose in compiling the present volume has been to contribute to the foundations of this enterprise by bringing together classic papers devoted to crucial problems involved in understanding natural language which range from issues of formal syntax and logical form to those of possible worlds and situation semantics The book begins with a comprehensive introduction composed by Jack Kulas the senior editor of this work which provides a systematic orientation to this complex field and ends with a selected bibliography intended to promote further research If our efforts assist others in dealing with these problems they will have been worthwhile J H F

Approaches to Natural Language Jaakko Hintikka, Patrick Suppes, J.M.E. Moravcsik, 2012-12-06 The papers and comments published in the present volume represent the proceedings of a research workshop on the grammar and semantics of natural languages held at Stanford University in the fall of 1970 The workshop met first for three days in September and then for a period of two days in November for extended discussion and analysis The workshop was sponsored by the Committee on Basic Research in Education which has been funded by the United States Office of Education through a grant to the National Academy of Education and the National Academy of Sciences National Research Council We acknowledge with pleasure the sponsorship which made possible a series of lively and stimulating meetings that were both enjoyable and instructive for the three of us and we hope for most of the participants including a number of local linguists and philosophers who did not contribute papers but actively joined in the discussion One of the central participants in the workshop was Richard Montague We record our sense of loss at his tragic death early in 1971 and we dedicate this volume to his memory None of the papers in the

present volume discusses explicitly problems of education In our view such a discussion is neither necessary nor sufficient for a contribution to basic research in education There are in fact good reasons why the kind of work reported in the present volume constitutes an important aspect of basic research in education
