Employment and Growth: Issues for the 1980s A. Steinherr, D. Weiserbs, 2012-12-06 The papers published in this book were presented and discussed on occasion of the celebration of Albert Kervyn de Lettenhove's retirement on 29-30 May 1986. This conference was made feasible through the participation of a large audience and the generous financial support of the Commission of the European Communities. The sessions were organized under three topics as are the papers in this book. The first session chaired by Massimo Russo, Director General, Commission of the European Communities, was devoted to an evaluation of past and current debates of central macroeconomic problems: those of growth and business cycle stabilization. The second session chaired by Jean Godeaux, Governor of Belgium's National Bank, looked at innovations in the conduct of monetary policy and the opportunities offered and problems associated with innovations in financial markets. The last session chaired by Baron Michel Woitrin, formerly Professor of Economics and Head Administrator of the Université Catholique de Louvain, contains several empirical analyses and policy proposals. 30 years ago, growth theory was a very promising research field at the center of macroeconomics and macroeconomics was at the center of economics. Robert Solow, one of the major contributors to growth theory, reexamines the pertinence of that body of theory to problems of our times. A. Steinherr and D. Weiserbs, eds. **Employment and Growth Issues for the 1980s** ISBN 90 247 3514 9

Some problems of development financing Mete Durdağ, 1973 **Socialism: Institutional, Philosophical and Economic Issues** S. Pejovich, 2012-12-06 It was Lenin's genius to recognize the importance of a socialist system with all the trappings of embellishing the democracy. If the people want a constitution, give them one and even include the bill of rights. If they want a parliament, give them that too. And a system of courts. If they want a federal system, create that myth as well. Above all, let them have elections for the act of voting is what the common man most clearly associates with democracy. Give them all these but make sure that they have no effect on how things are run. G. Warren Nutter. Most research by Western scholars has emphasized macroeconomics and to a considerable extent still does, as the method of analysis and growth rates as a standard for evaluating the performance of different economies. In the early 1960s, Nutter raised questions about the reported growth rates in socialist states, the importance of growth policies for human welfare, and the ability of macroeconomists to enhance our understanding of social and economic processes. In his work, Nutter used the standard price theory adjusted to incorporate the incentive effects of property rights in resources. He was castigated for defying the traditional wisdom. Not surprisingly, history has validated Nutter's theoretical framework and his conclusions.
