Science and Heritage Great Britain: Parliament: House of Lords: Science and Technology Committee,2006-11-16 The conservation of cultural artefacts such as buildings works of art and books presents a fascinating rich and diverse range of scientific challenges and the UK has a high reputation in the field based in large part on past achievements However the Committee s report finds that our national standing is now under threat as the sector is fragmented and under valued and the DCMS has completely failed to grasp the threat to heritage science and thus to conservation The Department s emphasis on widening public access to our cultural heritage is a laudable objective but this policy needs to be balanced by effective conservation based on sound science if we are to leave a sustainable cultural heritage for the benefit of future generations The Committee also calls on the heritage sector to come together in developing a broad based national strategy for heritage science to be championed at departmental level by the newly appointed DCMS Chief Scientific Adviser and co ordinated administratively by English Heritage drawing on input from all bodies active in the sector including those in Scotland Wales and Northern Ireland

Chemical Principles of Textile Conservation Agnes Timar-Balazsy,Dinah Eastop,2012-09-10 *Chemical Principles of Textile Conservation* provides must have knowledge for conservators who do not always have a scientific background This vital book brings together from many sources the material science necessary to understand the properties deterioration and investigation of textile artefacts It also aids understanding of the chemical processes during various treatments such as cleaning humidification drying disinfestation disinfection and the use of adhesives and consolidants in conservation of historical textiles Textile conservators will now have ready access to the necessary knowledge to understand the chemistry of the objects they are asked to treat and to make informed decisions about how to preserve textiles The combination of a chemist and a conservator provides the perfect authorial team It ensures a unique dual function of the text which provides textile conservators with vital chemical knowledge and gives scientists an understanding of textile conservation necessary to direct their research The many practical examples and case studies illustrate the utility of the relatively large chemical introduction and the essential chemical information which is included The case studies many illustrated in colour range from the treatment of the Ghandis clothes high altitude flying suits and a Mary Quant raincoat to the Hungarian Coronation Mantle
