**User Modelling in Text Generation** Cecile Paris,2015-12-17 This book addresses the issue of how the user s level of domain knowledge affects interaction with a computer system It demonstrates the feasibility of incorporating a model of user s domain knowledge into a natural language generation system

**User Modeling** Anthony Jameson,Cecile Paris,Carlo Tasso,2014-05-04 User modeling researchers look for ways of enabling interactive software systems to adapt to their users by constructing maintaining and exploiting user models which are representations of properties of individual users User modeling has been found to enhance the effectiveness and or usability of software systems in a wide variety of situations Techniques for user modeling have been developed and evaluated by researchers in a number of fields including artificial intelligence education psychology linguistics human computer interaction and information science The biennial series of International Conferences on User Modeling provides a forum in which academic and industrial researchers from all of these fields can exchange their complementary insights on user modeling issues The published proceedings of these conferences represent a major source of information about developments in this area

**User Models in Dialog Systems** Alfred Kobsa,Wolfgang Wahlster,2012-12-06 User models have recently attracted much research interest in the field of artificial intelligence dialog systems It has become evident that flexible user oriented dialog behavior of such systems can be achieved only if the system has access to a model of the user containing assumptions about his her background knowledge as well as his her goals and plans in consulting the system Research in the field of user models investigates how such assumptions can be automatically created represented and exploited by the system in the course of an on line interaction with the user The communication medium in this interaction need not necessarily be a natural language such as English or German Formal interaction languages are also permit ted The emphasis is placed on systems with natural language input and output however A dozen major and several more minor user modeling systems have been de signed and implemented in the last decade mostly in the context of natural language dialog systems The goal of UM86 the first international workshop on user model ing was to bring together the researchers working on these projects so that results could be discussed and analyzed and hopefully general insights be found that could prove useful for future research The meeting took place in Maria Laach a small village some 40 miles south of Bonn West Germany 25 prominent researchers were invited to participate
