Using The Strengths Perspective In Social Work Practice:

Using the Strengths Perspective in Social Work Practice Morley D. Glicken, 2004 Using the Strengths Perspective in Social Work Practice explains the major ideas behind the strengths perspective and then demonstrates through case studies and discussion how helping professionals can apply the strengths perspective in practice. The book is very research oriented and includes a great deal of new research on topics such as natural healing in addicted clients, self management of mental illness, a positive view of change in clients diagnosed with mental illness, the effectiveness of self help groups, research on resilience in children and adults who have experienced life traumas, research on the importance of spirituality and religious involvement, and new research data on the helping process. Most of the research used in this book has been published since 2000. The book has a unique feature: a critical response section at the end of every chapter in which clinicians and researchers have an opportunity to critically respond to ideas presented. This in effect provides an evidence based approach to the material in the book. Because the book shows the application of the strengths perspective in practice, Dr Glicken includes examples showing how to apply the approach with complex client problems including abuse, domestic violence, mental illness, addictions, and other complex problems often dealt with by clinicians in the helping professions. The book is written for the helping professions and includes the work of Martin Seligman in Psychology on learned optimism, Robert Putnam on community life in America, and Dennis Saleebey, one of the original writers on the strengths perspective in social work.

The Strengths Perspective in Social Work Practice Dennis Saleebey, 2006 The Strengths Perspective in Social Work Practice presents an unrivaled collection of essays that explain the strengths based philosophy, demonstrate how it works, and provide clear and practical tools for its application. It presents a balanced approach to social work practice in contrast to a problems based approach that takes into account the strengths and assets of clients and their environments.
