World Soils:

The Great Soil Groups of the World and Their Development K. D. Glinka, 1927 Soil Atlas of Asia Food and Agriculture Organization of the United Nations, EC/JRC, 2023-07-12 The European Commission's Joint Research Centre and FAO's Global Soil Partnership collaborated with experts from across Asia and other regions to produce the first ever Soil Atlas of Asia The aim of the Atlas is to raise awareness about the significance of soil to life in Asia among a wide range of audiences including the general public decision makers politicians teachers and scientists from other disciplines The Atlas comprises a series of annotated maps that demonstrate the diversity of soil characteristics across Asia in an easy to understand manner It also explains how soils are formed the key factors that shape soil characteristics and why these vary across the continent Moreover the Atlas emphasizes the role of soils in shaping our daily lives and highlights the growing pressures on soils resulting from urban expansion inappropriate land management pollution increased demand for food and climate change The Atlas encourages people to understand how their actions can help protect and restore soils while reducing degradation processes

Legal and Institutional Frameworks for Sustainable Soils Ian Hannam, Ben Boer, 2002 The 1992 United Nations Conference on Environment and Development placed a responsibility on States to protect the local regional and global environment especially problems shared by the whole community such as soil degradation The knowledge of the severe degradation situation of the world's soils and of the poor state of the soil legislation led the IUCN to pass a Soil Resolution at its World Congress in October 2000 for the IUCN Environmental Law Program to develop legal guidelines explanatory material and investigate a global legal instrument for the sustainable use of soils while paying particular attention to the ecological needs of soil and their ecological functions for the conservation of biodiversity and the maintenance of human life This book discusses an ecological based rationale for new international national and regional legislation and institutional frameworks for sustainable soil and a basis for the preparation of the instruments

The Soils of Egypt Hassan El-Ramady, Tarek Alshaal, Noura Bakr, Tamer Elbana, Elsayed Mohamed, Abdel-Aziz Belal, 2018-08-20 This book reviews the distribution of soils across Egypt their history genesis pollution and management The conservation of Egyptian soils soils and their connections to human activities as well as some future soil issues are also highlighted It is well known that soil is the main source for food feed fuel and fiber production Accordingly the study of soils is not only a crucial issue but also an urgent task for all nations worldwide Due to their important roles in agroecosystems as well as many aspects of our lives soils have direct and indirect functions in the agricultural industrial and medicinal sectors Therefore understanding the physical chemical and biological properties of soils as well as soil security have now become emerging issues Climate change has a very dangerous dimension in Egypt concerning the rising sea level Many coastal zones are already threatened by this sea level rise and may ultimately disappear At the same time water shortages and soil pollution represent the main challenges for the Egyptian nation Generally speaking the environmental challenges that Egypt

now faces include improving and sustaining soil health soil carbon sequestration wastewater treatment and avoiding the overuse of fertilizers and pesticides Therefore this book examines in detail the soils of Egypt from various perspectives including their genesis history classification pollution and degradation soil security soil fertility and land uses
