World Media Handbook 1990:

World media handbook, 1990 *Press Freedom and Communication in Africa* Festus Eribo, William Jong-Ebot, 1997 Recent years have seen considerable growth in the media in Africa with increases in the number of newspapers and radio and television stations At the same time there has been an increase in the number of arrests of journalists and broadcasters and various forms of censorship have been introduced The essays in this volume examine press censorship past and present and bring a fresh perspective to the position of the mass media in the African continent *Telecommunications Update*, Walford's Guide to Reference Material Marilyn Mullan, 1989 The British counterpart to Sheehy in which it is recommended and vice versa distributed in the US by Unipub Volume 3 completes the 5th edition with 8 833 entries vol 1 Science and technology 1989 5 995 entries vol 2 Social and historical sciences philosophy and religion 1990 7 166 entries While the majority of items are reference books Walford is a guide to reference material and therefore includes periodical articles microforms online and CD ROM sources A special effort has been made to make sure the output of small and specialist presses is not neglected Annotation copyrighted by Book News Inc Portland OR **Willing's Press Guide**, 1994 A guide to the press of the United Kingdom and to the principal publications of Europe Australia the Far East Gulf States and the U S A *Beyond National Sovereignty* Kaarle Nordenstreng, Herbert I. Schiller, 1993-01-01 This volume is a collection of contemporary commentaries on international communication issues with the concept of national sovereignty as the departure point Offering readers an introduction to current and emerging concerns it provides the basic analytical tools needed to understand the issues involved Problems are examined from the perspectives of journalism social sciences international politics law and emerging technology topics include mass media communication across borders communication satellites and Third World nations and the need to establish a new world information order **Willing's Press Guide and Advertisers' Directory and Handbook**, 1994 **Getting to War** W. Ben Hunt, 2010-05-18 This book shows how to predict wars More specifically it tells us how to anticipate in a timely fashion the scope and extent of interstate conflict By focusing on how all governments democratic or not seek to secure public support before undertaking risky moves such as starting a war Getting to War provides a methodology for identifying a regime's intention to launch a conflict well in advance of the actual initiation The goal here is the identification of leading indicators of war Getting to War develops such a leading political indicator by a systematic examination of the ways in which governments influence domestic and international information flows Regardless of the relative openness of the media system in question we can accurately gauge the underlying intentions of those governments by a systematic analysis of opinion leading articles in the mass media This analysis allows us to predict both the likelihood of conflict and what form of conflict military or diplomatic economic will occur Theoretically this book builds on a forty year old insight by Karl Deutsch that all governments seek to mobilize public opinion through mass media and that careful analysis of such domestic media activity could provide an early warning network of international conflict By showing

how to tap the link between conflict initiation and public support this book provides both a useful tool for understanding crisis behavior as well as new theoretical insights on how domestic politics help drive foreign policy Getting to War will be of interest to political scientists who study international disputes and national security as well as social scientists interested in media studies and political communication General readers with an interest in military or diplomatic history particularly U S history will find that Getting to War provides an entirely new perspective on how to understand wars and international crises W Ben Hunt is Assistant Professor of Politics New York University
