Solving Moral Problems A Strategy For Practical Inquiry:

Solving Moral Problems Ronald McLaren,1989 *Food Biotechnology in Ethical Perspective* Paul B.

Thompson,2007-05-05 Agrifood biotechnology the genetic transformation of plants and animals through recombinant means has created controversy in the food system for more than twenty years This thoroughly revised and amended edition of Paul B Thompson s path breaking study of ethical and philosophical issues raised by this technology up to date The original 1997 edition was the first book length treatment by a philosopher to focus on food and agricultural biotechnology covering ethical issues associated with risk assessment labelling animal transformation patents and the impact of biotechnology on traditional farming communities in both the developed and developing world The new edition reflects lessons from the hotly contested debates over those issues in the intervening decade and includes wholly new discussions on ethical issues associated with livestock cloning the Precautionary Principle and the transatlantic debate between United States and European perspectives on biotechnology Thompson s unique and insightful approach to addressing the risks and questions of public acceptability associated with novel technology stands as a model for anyone interested in technological innovation and social change The book should be of interest to scholars and citizens interested in the Internet or nanotechnology while it remains an essential resource for understanding the twists and turns of debate over the role of molecular genetics in the transformation of the global food system

Science and Moral Imagination Matthew J. Brown,2020-11-17 The idea that science is or should be value free and that values are or should be formed independently of science has been under fire by philosophers of science for decades Science and Moral Imagination directly challenges the idea that science and values cannot and should not influence each other Matthew J Brown argues that science and values mutually influence and implicate one another that the influence of values on science is pervasive and must be responsibly managed and that science can and should have an influence on our values This interplay he explains must be guided by accounts of scientific inquiry and value judgment that are sensitive to the complexities of their interactions Brown presents scientific inquiry and value judgment as types of problem solving practices and provides a new framework for thinking about how we might ethically evaluate episodes and decisions in science while offering guidance for scientific practitioners and institutions about how they can incorporate value judgments into their work His framework dubbed the ideal of moral imagination emphasizes the role of imagination in value judgment and the positive role that value judgment plays in science

The Journal of Philosophy ,1988 *The Blackwell Guide to the Philosophy of the Social Sciences* Stephen P. Turner,Paul A. Roth,2008-04-15 The Blackwell Guide to the Philosophy of the Social Sciences collects newly commissioned essays that examine fundamental issues in the social sciences **Global food security:**

ethical and legal challenges Carlos M. Romeo Casabona,Leire Escajedo San Epifanio,Aitziber Emaldi Ciri3n,2023-09-04

Food security will exist when all people at all times have physical and economic access to sufficient safe and nutritious food to meet their dietary needs and food preferences for an active and healthy life as stated in the Rome Declaration in 1996 Given the dimension of the current global food crisis food security means adopting effective and specific actions at individual household national regional and global levels Food security invites us to reflect upon ethical principles like human equity justice between current and future generations respect for human dignity and sustainable food production We strive to maintain our basic ethical convictions and engage in societal debates about other important values While we do this we may have to change our ways of life and learn to create new priorities in the face of global responsibility Science and technology are key tools to reach the Millenium Goals providing both society and decision makers alike with relevant information and new options within an ethical framework The contributions found in this publication bring together the perspectives of a diverse group of authors Coming from the academic world the public sector and non governmental organisations NGOs they provide the latest views on Global food security ethical and legal challenges *Being Beheld* Jordan Mason,2025-12-11 *Being Beheld* explores the standardization of clinical ethics techniques and articulates how its integrity depends on our dissent from such standardization Moving between philosophical theological and practical lenses it offers a reorientation of ethics to participation in the good of the other mirroring the Christian Eucharistic liturgy Whitaker's Books in Print ,1990
