[Personal Identity and Buddhist Philosophy](#) Mark Siderits, 2017-05-15 Since the publication of Mark Siderits important book in 2003 much has changed in the field of Buddhist philosophy There has been unprecedented growth in analytic metaphysics and a considerable amount of new work on Indian theories of the self and personal identity has emerged Fully revised and updated and drawing on these changes as well as on developments in the author's own thinking Personal Identity and Buddhist Philosophy second edition explores the conversation between Buddhist and Western Philosophy showing how concepts and tools drawn from one philosophical tradition can help solve problems arising in another Siderits discusses afresh areas involved in the philosophical investigation of persons including vagueness and its implications for personal identity recent attempts by scholars of Buddhist philosophy to defend the attribution of an emergentist account of personhood to at least some Buddhists and whether a distinctively Buddhist antirealism can avoid problems that beset other forms of ontological anti foundationalism

Philosophical Perspectives on Psychedelic Psychiatry Chris Letheby, Philip Gerrans, 2024-08-19 A recent wave of research in psychiatry and neuroscience has re examined the properties of classic psychedelic substances also known as serotonergic hallucinogens such as psilocybin LSD and DMT Evidence to date suggests that psychedelics can be given safely in controlled conditions at moderate to high doses and may have potential as therapeutic agents in the treatment of various addictive and mood disorders The main mechanism of action appears to be the induction of a dramatically altered state of consciousness but the details of how psychedelic assisted psychotherapy works are hotly debated as are the relations between psychedelic experiences themselves and the neural changes induced by the drugs Philosophical Perspectives on Psychedelic Psychiatry addresses the fascinating philosophical questions raised by the renewed psychiatric use of psychedelics with chapters from leading philosophers of mind science and psychiatry centred around three main themes

Chapters in the self and mind section ask what can we learn about the self and the mind from psychedelic science Chapters in the science and psychiatry section address methodological theoretical and clinical questions concerning how psychedelics can best be studied scientifically and used therapeutically and how they might work to relieve psychiatric suffering Finally chapters in the ethics and spirituality section address broader questions about the interpretation of psychedelic experience its ethical implications and its possible roles in the broader culture Fourth Grade Success Susan Mackey Collins,2011-05
