Farrell, 2018-06-28 Asia was the principle focus of empire builders from Alexander and Akbar to Chinggis Khan and Qianlong and yet until now there has been no attempt to provide a comprehensive history of empire in the region Empire in Asia addresses the need for a thorough survey of the topic This volume traces the evolution of a constellation of competing empires in Asia from the 13th through to the 18th centuries Separate chapters will describe the history and characteristic features of imperial regimes in each major sub region of Asia from the Ottomans and Safavids in the West Romanovs in the North Mughals in the South the Mongols their successors in Inner Asia to the Ming and Qing Dynasties in the East The contributors address common questions in considering the various empires including How did imperial Asian states understand themselves and their place in the world How were these empires constructed and how did they attain such prominence To what extent did imperial repertoires of rule differ The two volumes of Empire in Asia offer a significant contribution to the theory and practice of empire when considered globally and comparatively and are essential reading for all students and scholars of global imperial and Asian history

**The Bukharan Crisis** Scott Levi, 2020-05-26 In the first half of the eighteenth century Central Asia's Bukharan Khanate descended into a crisis from which it would not recover Bukharans suffered failed harvests and famine a severe fiscal downturn invasions from the north and the south rebellion and then revolution To date efforts to identify the cause of this crisis have focused on the assumption that the region became isolated from early modern globalizing trends The Bukharan Crisis exposes that explanation as a flawed relic of early Orientalist scholarship on the region In its place Scott Levi identifies multiple causal factors that underpinned the Bukharan crisis Some of these were interrelated and some independent some unfolded over long periods while others shocked the region more abruptly but they all converged in the early eighteenth century to the detriment of the Bukharan Khanate and those dependent upon it Levi applies an integrative framework of analysis that repositions Central Asia in recent scholarship on multiple themes in early modern Eurasian and world history

Rome in the Third Century Michael Sage,2025-01-31 An in depth exploration of Rome s third century crisis examining its internal turmoil external pressures and transformative reforms For its first two centuries the Roman Empire enjoyed a relatively peaceful existence There were short periods of trouble and instability but they had no lasting effect At the end of the second century AD the situation began to change and by the third century the Empire was beset by serious internal and external threats *Rome in the Third Century* examines this time of troubles Michael Sage begins by analyzing the available sources which are difficult to use and provide mostly fragmentary glimpses of the period and looks at the surprising disappearance of historical writing in the western half of the empire He then discusses in detail the increasing pressures on Rome s northern and eastern frontiers along with the growing internal threats that the empire faced as the state weakened and experienced increasing internal disintegration He then narrates the period between the death of the emperor Septimius Severus in 211 and the accession of the emperor Diocletian at the end of the century when a reformed empire emerged in many respects very different from its predecessor The crucial changes in government and the military of this period are explained and assessed and there is a new analysis of contemporary views both Christian and pagan of the crisis

**Humans versus Nature** Daniel R. Headrick,2019-12-02 Since the appearance of Homo sapiens on the planet hundreds of thousands of years ago human beings have sought to exploit their environments extracting as many resources as their technological ingenuity has allowed As technologies have advanced in recent centuries that impulse has remained largely unchecked exponentially accelerating the human impact on the environment *Humans versus Nature* tells a history of the global environment from the Stone Age to the present emphasizing the adversarial relationship between the human and natural worlds Nature is cast as an active protagonist rather than a mere backdrop or victim of human malfeasance Daniel R Headrick shows how environmental changes epidemics climate shocks and volcanic eruptions have molded human societies and cultures sometimes overwhelming them At the same time he traces the history of anthropogenic changes in the environment species extinctions global warming deforestation and resource depletion back to the age of hunters and gatherers and the first farmers and herders He shows how human interventions such as irrigation systems over fishing and the Industrial Revolution have in turn harmed the very societies that initiated them Throughout Headrick examines how human driven environmental changes are interwoven with larger global systems dramatically reshaping the complex

relationship between people and the natural world In doing so he roots the current environmental crisis in the deep past
