Tuber Crops:

The Tropical Tuber Crops I. C. Onwueme, 1978 Tropical Root and Tuber Crops I. C. Onwueme, Winston B. Charles, Food and Agriculture Organization of the United Nations, 1994-01-01 Plant Protection in Tropical Root and Tuber Crops P. Parvatha Reddy, 2015-06-05 This book is a compilation of information on insect mite vertebrate pests and fungal bacterial viral mycoplasma nematode diseases of tropical root and tuber crops such as cassava sweet potato yams taro Amorphophallus yam bean and tannia The book highlights the distribution symptoms and damage biology survival and spread of each pest and describes management methods It also sheds light on different eco friendly pest management strategies including physical cultural chemical biological host resistance and integrated methods The book is written in a lucid style using easy to understand language and offers adoptable recommendations involving eco friendly control measures It serves as a useful reference source for policy makers research and extension workers practicing farmers and students The material can also be used for teaching post graduate courses in state agricultural universities **Underutilized Tuber Crops of the Himalayan Region** Arun Kumar Gupta, Pradeep Singh Negi, 2026-02-12 Underutilized Tuber Crops of the Himalayan Region Nutraceutical Potential Processing and Applications explores significant yet underutilized edible tubers known for their bioactive and pharmacological properties as well as their preservation potential The book presents detailed information on historical uses phytochemistry pharmacology distribution processing toxicity conservation and future prospects of these tubers along with their market relevance It also covers various processing and preservation techniques to maximize their utility as ingredients or additives in food products By integrating neglected and underutilized tubers into the current agricultural portfolio alongside environmentally sustainable farming practices the book provides valuable insights for food scientists and agricultural professionals working to ensure a secure nutritious food supply while addressing the challenges of environmental change Covers underutilized edible tubers from around the world and their potential for nutraceutical applications Reviews the nutritional and pharmacological properties of underutilized tuber crops Supports global efforts in sustainable agriculture and agrobiodiversity by promoting neglected and underutilized tubers **Root and Tuber Crops** J.E. Bradshaw, 2010-09-11 It is important to include Tuber and Root Crops in the Handbook of Plant Breeding They include starchy staple crops that are of increasing importance for global food security and relief of poverty important millennium goals for the United Nations Indeed 2008 was the UN International Year of the Potato in recognition of this role of the potato as the world's third most important food crop after wheat and rice The other major staples are cassava sweetpotato and yam Together they occupy about 50 million hectares with production at 640 million metric tons of which 70% is in developing countries In total there are more than 30 species of Root and Tuber Crops grown in the world today Given the content of other volumes in the series it makes sense to include sugar and fodder beets swedes and turnips and minor root and tuber crops so that the book series is as complete as possible Like the other volumes in the series this one will present information

on the latest in applied plant breeding using the current advances in the field from an efficient use of genetic resources to the impact of biotechnology in plant breeding Seven crop specific chapters are proposed together with an introduction to this diverse set of plant species Outstanding scientists for each crop species are proposed as senior authors who may invite co authors to contribute part of a chapter In order to increase the overall acceptance of the volume balance will be sought with authors from different research groups countries who will be asked to contribute and collaborate where appropriate The book should be of interest to researchers in both academic and industrial settings and in both developed and developing countries as well as students and teachers of plant breeding It is currently extremely important to educate and train a new generation of plant breeders given the challenges faced by humankind in producing more food for an expanding global population during a period of environmental including climate change *Tuber Crops* Saurindra Prasad Ghosh,1988
