ASSESSMENT OF HOUSEHOLD CARBON FOOTPRINT REDUCTION POTENTIALS. ,2009 The term household carbon footprint refers to the total annual carbon emissions associated with household consumption of energy goods and services In this project Lawrence Berkeley National Laboratory developed a carbon footprint modeling framework that characterizes the key underlying technologies and processes that contribute to household carbon footprints in California and the United States The approach breaks down the carbon footprint by 35 different household fuel end uses and 32 different supply chain fuel end uses This level of end use detail allows energy and policy analysts to better understand the underlying technologies and processes contributing to the carbon footprint of California households The modeling framework was applied to estimate the annual home energy and supply chain carbon footprints of a prototypical California household A preliminary assessment of parameter uncertainty associated with key model input data was also conducted To illustrate the policy relevance of this modeling framework a case study was conducted that analyzed the achievable carbon footprint reductions associated with the adoption of energy efficient household and supply chain technologies **The Sustainability Practitioner's Guide to Input-output Analysis** Joy Murray,Richard Wood,2010 Provides an introduction to input output analysis for sustainability practitioners and looks into the how of measuring our impacts tracking our progress and informing the decisions for a sustainable future *Promoting Sustainable Building Materials and the Implications on the Use of Wood in Buildings* Helen Goodland,2016 This study provides an overview of the current policy and regulatory environment regarding sustainable construction materials in the building sector in Europe and North America and where applicable offers a commentary on the effectiveness of such regimes in driving the adoption of wood products The study s objective has been to conduct a broad survey across a range of policies initiatives and programmes in order to document the current circumstances as a starting point for further discussions technical meetings and policy debates with a view to enhance the use of wood in buildings through policy advice to member states **Japan's Official Development Assistance White Paper** ,2008
