If I had 100 cattle on a farm, and 13% of them caused half of the farm's problems, what should I do with those 13 cattle?

If 13% of your 100 cattle are causing half of the farm's problems, it would be advisable to separate and remove those 13 cattle from the rest of the herd. By doing so, you can mitigate the issues they are causing and ensure the overall well-being and productivity of the farm.
