**Bare Facts and Naked Truths** George Englebretsen, 2017-09-29 The very idea of truth as a substantial and meaningful concept has been under attack recently from advocates of New Age and postmodern theories In this book Englebretsen defends the notions of truth and objectivity as key to the scientific view of the natural world and presents an original defence of the commonsense correspondence theory of truth Englebretsen's approach overcomes the traditional difficulties of correspondence theories of truth with providing adequate and convincing accounts of truth bearers truth makers and the correspondence relation between them by taking truth bearers to be propositions and facts as constitutive properties of the world This accessibly written book surveys all of the major competing theories of truth coherence pragmatic redundancy semantic deflationary disquotational minimalist before formulating the new defence of the correspondence theory and then exploring the consequences of the theory for issues in epistemology and ontology The book concludes by showing how the idea of propositional depth can be used to dissolve the Liar paradoxes

**The Two Truths Debate** Sonam Thakchoe, 2007-10 The Middle Way is a central idea for all Buddhists yet its definition varies across Buddhist cultures In Tibetan Buddhism the interpretation of what are called the two truths the truth of conventional appearances and the ultimate truth of emptiness is especially contentious This comparative analysis examines the differing approaches toward the Middle Way taken by the two great Buddhist scholars Tsongkhapa and Gorampa It demonstrates how philosophical positions have dramatic implications both for how one approaches Buddhist practice and for how one ultimately understands enlightenment itself

**The Truth about Nature** Bram Büscher, 2020-12-15 How should we share the truth about the environmental crisis At a moment when even the most basic facts about ecology and the climate face contestation and contempt environmental advocates are at an impasse Many have turned to social media and digital technologies to shift the tide But what if their strategy is not only flawed but dangerous The Truth about Nature follows environmental actors as they turn to the internet to save nature It documents how conservation efforts are transformed through the political economy of platforms and the algorithmic feeds that have been instrumental to the rise of post truth politics Developing a novel account of post truth as an expression of power under platform capitalism Bram Büscher shows how environmental actors attempt to mediate between structural forms of platform power and the contingent histories and contexts of particular environmental issues Bringing efforts at wildlife protection in Southern Africa into dialogue with a sweeping analysis of truth and power in the twenty first century Büscher makes the case for a new environmental politics that radically reignites the art of speaking truth to power

**Quantifiers, Quantifiers, and Quantifiers: Themes in Logic, Metaphysics, and Language** Alessandro Torza, 2015-07-23 This volume covers a wide range of topics that fall under the philosophy of quantifiers a philosophy that spans across multiple areas such as logic metaphysics epistemology and even the history of philosophy It discusses the import of quantifier variance in the model theory of mathematics It advances an argument for the uniqueness of quantifier

meaning in terms of Evert Beth's notion of implicit definition and clarifies the oldest explicit formulation of quantifier variance the one proposed by Rudolf Carnap The volume further examines what it means that a quantifier can have multiple meanings and addresses how existential vagueness can induce vagueness in our modal notions Finally the book explores the role played by quantifiers with respect to various kinds of semantic paradoxes the logicity issue ontological commitment and the behavior of quantifiers in intensional contexts The Atlas of Reality Robert C.
