Tsunami Years:

Ecological Impacts of Tsunamis on Coastal Ecosystems Jotaro Urabe, Tohru Nakashizuka, 2016-10-28 This book focuses on the ecological impacts of the Great East Japan Earthquake and resulting tsunamis a rare and extremely large disturbance event on various coastal ecosystems in Japan's Tohoku area including sub tidal and tidal animal communities sand dune plant communities and coastal forests The studies presented here describe not only how species and populations in these ecosystems were disturbed by the earthquake and tsunamis but also how the communities have responded to the event and what types of anthropogenic activities will hamper their recovery processes In the ecological sciences it is often argued that large disturbances are critical to shaping community structures and biodiversity in local and regional habitats However our understanding of these roles remains limited simply because there have been few opportunities to examine and address the ecological impacts of large disturbance events The scale of the 2011 Great East Japan Earthquake makes it one of the largest hazards in the past 1000 years Thus this book provides a unique opportunity to advance our understanding of the ecological impacts of large and rare disturbances and the implications of these events in the conservation and management of coastal ecosystems Following an outline of the Great East Japan Earthquake the book's content is divided into two major parts Part I reports on studies examining the ecological impacts of the tsunamis on sub tidal and tidal animal communities while Part II focuses on terrestrial plant communities in Japan's coastal Tohoku area This book will benefit all scientists interested in the ecological impacts of large disturbances on aquatic and terrestrial ecosystems in general and especially those who are interested in the ecological management of coastal ecosystems and Ecosystem based Disaster Risk Reduction EcoDRR

Asian American Poets Guiyou Huang, 2002-05-30 Even though Asian American literature is enjoying an impressive critical popularity attention has focused primarily on longer narrative forms such as the novel And despite the proliferation of a large number of poets of Asian descent in the 20th century Asian American poetry remains a neglected area of study Poetry as an elite genre has not reached the level of popularity of the novel or short story partly due to the difficulties of reading and interpreting poetic texts The lack of criticism on Asian American poetry speaks to the urgent need for scholarship in this area since perhaps more than any other genre poetry most forcefully captures the intense feelings and emotions that Asian Americans have experienced about themselves and their world This reference book overviews the tremendous cultural contributions of Asian American poets Included are alphabetically arranged entries on 48 American poets of Asian descent most of whom have been active during the latter half of the 20th century Each entry begins with a short biography which sometimes includes information drawn from personal interviews The entries then discuss the poet's major works and themes

including such concerns as family racism sexism identity language and politics A survey of the poet s critical reception follows In many cases the existing criticism is scant and the entries offer new readings of neglected works The entries conclude with bibliographies of primary and secondary texts and the volume closes with a selected general bibliography

Island Ecosystems Stephen J. Walsh,Carlos F. Mena,Jill R. Stewart,Juan Pablo Muñoz Pérez,2023-05-10 Sustainable development is a process to improve the quality of life of people while maintaining the ability of social ecological systems to continue to provide valuable ecological services that social systems require In the Galapagos Islands the maintenance of amenity resources to support tourism and the quality of life of residents is explicitly linked to ecosystem goods and services particularly the accessibility to high quality natural environments and the terrestrial and marine visitation sites that showcase iconic species On June 26 30 2022 the Galapagos Science Center celebrated its 10 Year Anniversary As the crowning event of the anniversary celebration the World Summit on Island Sustainability was held on San Cristobal Island Galapagos Archipelago of Ecuador The intent of the World Summit was to bring together leading experts on island ecosystems and particularly on island sustainability from across the globe to represent a diversity of perspectives approaches and stakeholder groups The World Summit was an exclusive event that featured an expert convening of scholars and practitioners to address the social terrestrial and marine sub systems of the Galapagos Islands and other similarly challenged island ecosystems from around the globe The World Summit attracted 150 scientists to the Galapagos Islands to discuss projects conducted for instance in the Galapagos Islands Hawaii Guam French Polynesia Chile Australia and the Caribbean Islands Island vulnerability resilience and sustainability were examined by scholars for instance from the University of North Carolina at Chapel Hill Universidad San Francisco de Quito Catholic University of Chile University of Guam James Cook University University of the Sunshine Coast North Carolina State University North Carolina Museum of Natural Sciences California Academy of Sciences University of San Francisco and the University of South Alabama as well as affiliated scientists from Exeter University University of Edinburgh University of Southampton and the Galapagos National Park The World Summit also included scholars from Re wild World Wildlife Fund EarthEcho and the East West Center Hawaii

Natural Hazards in the Asia-Pacific Region James P. Terry,James

Rodney Goff,2012 Even a cursory glance at any map of the Asia Pacific region makes a striking impression in addition to the large continental landmass the region encompasses a truly vast expanse of ocean dispersed over which are thousands of islands Many might say that it could not be a worse time to live in this region In the past few years we have experienced not only a number of devastating tsunamis Indonesia Solomon Islands Samoa Japan but should not forget either the seemingly endless list of other natural hazards such as tropical cyclones and typhoons volcanic eruptions river floods and wildfires amongst numerous others
