Chemistry of Functional Groups is one of chemistry's landmark book series in organic chemistry. An indispensable resource for the organic chemist, this is the most comprehensive reference available in functional group chemistry. Founded in 1964 by the late Professor Saul Patai, the aim of Patai's Chemistry of Functional Groups is to cover all the aspects of the chemistry of an important functional group in each volume, with the emphasis not only on the functional group but on the whole molecule.

**The Physics and Chemistry of Organic Superconductors** Gunzi Saito, 1990    **Kagaku Shōhō**, 1986    **Canadian Journal of Chemistry**, 2001    **Theoretical Chemistry**, 1988-07. Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research. Written by experts in their specialist fields, the series creates a unique service for the active research chemist, supplying regular, critical-in-depth accounts of progress in particular areas of chemistry. For over 90 years, The Royal Society of Chemistry and its predecessor, the Chemical Society, have been publishing reports charting developments in chemistry, which originally took the form of Annual Reports. However, by 1967, the whole spectrum of chemistry could no longer be contained within one volume, and the series Specialist Periodical Reports was born. The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic, Organic, and Physical Chemistry. For more general coverage of the highlights in chemistry, they remain a must. Since that time, the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry. Some titles have remained unchanged, while others have altered their emphasis along with their titles; some have been combined under a new name, whereas others have had to be discontinued. The current list of Specialist Periodical Reports can be seen on the inside flap of this volume.    **Bulletin of the Chemical Society of Japan** Nihon Kagakkai, 1988    ISCOM 2003 Patrick Batail, 2004    *Bulletin of the Korean Chemical Society*, 2003    *The Journal of Physics and Chemistry of Solids*, 1993
