These include syllable structure vowel and consonant harmony tone and sound symbolism polysynthesis the nature of roots and affixes incorporation and morpheme order case grammatical distinctions of number gender shape control location means manner time empathy and evidence and distinctions between nouns and verbs predicates and arguments and simple and complex sentences and special speech styles. Part II catalogues the languages by family listing the location of each language its genetic affiliation number of speakers major published literature and structural highlights. The Prosody of Mandarin Chinese Xiao-nan Susan Shen, 1990-01-01 Through acoustic analysis of Mandarin Chinese intonation the author finds that the intonation baseline moves up when intonation is shifted from assertive to interrogative therefore two baselines and two intonation layers must be reckoned with Sentence intonation affects the tonal values and the tonal shapes of intrinsic lexical tones though not beyond recognition Tonal changes prove to be closely related to sentence intonation which is superimposed simultaneously onto the utterance as a whole The author's findings support the position of the movability of the intonation baseline and rectify some widely spread traditional claims concerning Mandarin Chinese prosody
