Green Building Top:

The World's Greenest Buildings Jerry Yudelson, 2013-01-17 The World's Greenest Buildings tackles an audacious task. Among the thousands of green buildings out there, which are the best and how do we know? Authors Jerry Yudelson and Ulf Meyer examined hundreds of the highest rated large green buildings from around the world and asked their owners to supply one simple thing: actual performance data to demonstrate their claims to sustainable operations. This pivotal book presents an overview of the rating systems and shows best-in-class building performance in North America, Europe, the Middle East, India, China, Australia, and the Asia Pacific region. Practical examples of best practices for greening both new and existing buildings, a practical reference for how green buildings actually perform at the highest level, one that takes you step-by-step through many different design solutions, a wealth of exemplary case studies of successful green building projects using actual performance data from which to learn, interviews with architects, engineers, building owners, and developers, and industry experts to provide added insight into the greening process. This guide uncovers some of the pitfalls that lie ahead for sustainable design and points the way toward much faster progress in the decade ahead.

Sustainable Smart Cities in India Poonam Sharma, Swati Rajput, 2017-03-27 This book presents fundamental and applied research aimed at the development of smart cities across India. Based on the exploration of an extensive array of multidisciplinary literature, this book discusses critical factors of smart city initiatives: management and organization, technology, governance, policy, people, and communities, economy, infrastructure, and natural environment. These factors are broadly covered under the integrative framework of the book to examine the vision and challenges of smart city initiatives. The book suggests directions and agendas for smart city research and outlines practical implications for government professionals, students, research scholars, and policy makers. A lot of work is happening on smart cities as it is an upcoming area of research and development. At international level and even in India, the concept of smart cities is a hot topic at universities, research centers, ministries, transport departments, civic bodies, environment, energy, and disaster organizations, town planners, and policy makers. This book provides ideas and information to government officials, investors, experts, and research students.

[Climate Action 2009/2010](#) Sustainable Development International, United Nations Environment Programme, 2009 This third annual edition of Climate Action focuses on some of the major issues for resolution in Copenhagen and the actors who can help to implement the solutions. Progress will require commitment and cooperation. Partnerships will be central both in Copenhagen and beyond. Climate Action is produced to encourage and assist governments and business to lower greenhouse gas (GHG) emissions. This book features a range of articles that encourage the sharing of best practice and the development of new technologies and initiatives, and illustrates the opportunities for business and governments to reduce costs and increase profits while tackling climate change. The articles cover Human Impact, Policy, Business, and Finance, Technology, Energy, Transport, Ecosystem Services, Built Environment, and a Regional Focus on Canada.
