New Approaches for Sustainable & Resilient Processes and Products of Social Housing Development in the Arabian Gulf Countries Khaled Galal Ahmed, Mohamed H. Elnabawi Mahgoub, Lindita Bande, Martin Scoppa, 2023-10-16 Social housing has been a forefront research topic especially from its economic and socio cultural factors The nature of social housing in the Arabian Gulf Countries has been distinctive in its approach with usually generous areas and urban sprawl designs Recently most of these Arabian Gulf Countries have gone through profound transformation in their social and housing paradigms influenced by their sustainability adopted agendas Still scholarly documentation and analysis of the processes and products of these transformed paradigms are largely missing or at least fragmented So there is a desperate need to boost research work in this field as related to each city country in this region with largely expected mutual effects that these experiences might have on each other and on the global debate about sustainable and resilient social housing as a whole

improving society's welfare is through economic development. One of the dominant aspects in economic development is through legal development. Good law or policy in such a country will have some impacts on the existence of good economic growth because supremacy of law is one aspect of a good governance. Law supremacy is an important institution which is related to economic growth because the rule of law ensures personal safety, property rights, unbiased contract enforcement, stability of politics, freedom of speech, and control of corruption. According to those various issues and debates on economic legal development and good governance, then the Doctoral Program of the Faculty of Law Sebelas Maret University needs to hold an international conference as a place for exchanging some academic ideas in order to contribute to those legal issues with a theme: **INTERNATIONAL CONFERENCE ON LAW, ECONOMICS AND GOOD GOVERNANCE**

Power System Economic and Market Operations Jin Zhong, 2018-01-12. Power system operation is one of the important issues in the power industry. The book aims to provide readers with the methods and algorithms to save the total cost in electricity generation and transmission. It begins with traditional power systems and builds into the fundamentals of power system operation: economic dispatch (ED), optimal power flow (OPF), and unit commitment (UC). The book covers electricity pricing mechanisms such as nodal pricing and zonal pricing based on Security Constrained ED (SCED) or SCUC. The operation of energy market and ancillary service market are also explored. It covers a wide range of interesting topics which could be very useful for understanding the main phenomena ruling power systems economy such as Optimal Power Flow analysis and unit Commitments. It addresses topics widely treated in the literature; hence it is important to outline its distinctive features compared to other similar books. The book is well structured and well balanced. The Green New Deal Jeremy Rifkin, 2019-09-10. New York Times Bestselling Author. The renowned economic theorist explains how America can and must create a post-fossil fuel culture to survive. We can't keep doing business as usual. Facing a global emergency, a younger generation has spearheaded a national conversation around a Green New Deal, a movement with the potential to revolutionize society. But while the Green New Deal has become a lightning rod in the political sphere, there is a parallel movement emerging within the business community that will shake the very foundation of the global economy in coming years. Key sectors of the economy are fast decoupling from fossil fuels in favor of ever-cheaper solar and wind energies and the new business opportunities and employment that accompany them. New studies are sounding the alarm that trillions of dollars in stranded fossil fuel assets could create a carbon bubble likely to burst by 2028, causing the collapse of the fossil fuel civilization. The marketplace is speaking, and governments will need to adapt if they are to survive and prosper. In *The Green New Deal*, Jeremy Rifkin delivers the political narrative and economic plan for the Green New Deal that we need at this critical moment in history. The concurrence of a stranded fossil fuel assets bubble and a green political vision opens up the possibility of a massive shift to a post-carbon ecological era in time to prevent a temperature rise that will tip us over the edge into runaway climate change. With twenty-five years of experience implementing Green New Deal style transitions for

both the European Union and the People's Republic of China. Rifkin offers his vision for how to transform the global economy and save life on Earth. The Green New Deal takes a stance quite different from that of typical Green New Deal supporters; he is interested in building factories, farms, and vehicles in a fossil-free world, asserting that the Green New Deal is all about infrastructure. The New York Times Book Review: An urgent endorsement of efforts to remake a doomed fossil fuel economy before it's too late. Kirkus Reviews
