

# State Theories

- *The State* is the ultimate authority, meaning that its authority stands above all others.
- However, individuals in *civil society* also have control over the state, even in non-democratic societies.
- Two very different theories have evolved to address the relationship between the State and civil society:

rights without discrimination These rights are all interrelated interdependent and indivisible Universal human rights are often expressed and guaranteed by law in the forms of treaties customary international law general principles and other sources of international law International human rights law lays down obligations of Governments to act in certain ways or to refrain from certain acts in order to promote and protect human rights and fundamental freedoms of individuals or groups Human rights are inalienable They should not be taken away except in specific situations and according to due process For example the right to liberty may be restricted if a person is found guilty of a crime by a court of law Interdependent and indivisible All human rights are indivisible whether they are civil and political rights such as the right to life equality before the law and freedom of expression economic social and cultural rights such as the rights to work social security and education or collective rights such as the rights to development and self determination are indivisible interrelated and interdependent The improvement of one right facilitates advancement of the others Likewise the deprivation of one right adversely affects the others Equal and non discriminatory Non discrimination is a crosscutting principle in international human rights law The principle is present in all the major human rights treaties and provides the central theme of some of international human rights conventions such as the International Convention on the Elimination of All Forms of Racial Discrimination and the Convention on the Elimination of All Forms of Discrimination against Women Human Rights as parts of moral discourse have significant implication on content of political social and economic life of human beings

**Issues In International Relations** Trevor C. Salmon, Mark F. Imber, 2008-06-06 Students come to study International Relations at university driven by a variety of motives and active concern to study great contemporary issues such as the causes and persistence of war threats of nuclear proliferation and terrorism the persistence of global poverty amid globalization's riches and longer term threats to sustainable development Building on the success of the first edition Issues in International Relations 2ed provides students with a clear but stimulating introduction to the most significant issues within international relations in the 21st Century Written by experienced teachers in a jargon free way it assumes no prior knowledge of the subject and allows students approaching International Relations for the first time to gain confidence in what is an often complicated and confusing discipline Completely revised throughout with the addition of ten new chapters this textbook introduces key conceptual issues including theories of international relations power sovereignty and globalisation considers contemporary global problems such as force and security law and military intervention terrorism the environment religion explains the relationship between global politics and economics with chapters on international organisations international political economy and development provides students with boxed revision style notes and case studies throughout the text and a guide to further reading and websites at the end of each chapter This book is ideal reading for students on introductory international relations courses

Theories of the Democratic State John Dryzek, Patrick Dunleavy, 2009-05-14 We live in a world governed by states whose enduring importance and domination of contemporary politics has been strikingly underlined

by their renewed activism in the face of a global economic crisis Yet the very nature of states remains deeply contested with a range of competing theories offering very different views of how they actually do or should operate In the past this competition has lead to deep ideological conflict and even to war In this major new work John S Dryzek and Patrick Dunleavy provide a broad ranging assessment of classical and contemporary theories of the state focusing primarily on the democratic state form that has come to dominate modern politics The authors starting point is the classical theories of the state pluralism elite theory Marxism and market liberalism They then turn to the contemporary forms of pluralism prevalent in political science systematically exploring how they address central issues such as networked governance globalization and changing patterns of electoral and identity politics They proceed to analyse a range of key contemporary critiques of modern states and democracy that have emerged from feminism environmentalism neo conservatism and post modernism Each approach is carefully introduced and analysed as far as possible in relation to a common set of issues and headings Theories of the Democratic State takes the reader straight to the heart of contemporary issues and debates and in the process provides a challenging and distinctive introduction to and reassessment of contemporary political science *The Current Issue* ,1908
