China's Unfinished Economic Revolution Nicholas R. Lardy,1998-07-01 China s Unfinished Economic Revolution offers a fundamentally different interpretation of China s economic reform The common view that China s gradualistic approach has served it well overlooks the fact that state owned banks for the last two decades have channeled a large share of sharply rising household savings into what are mostly unreformed money losing companies The result is that several of China s largest financial institutions now are insolvent To avoid a major domestic banking crisis the book argues that China must recapitalize and restructure its domestic banking system and end the long standing practice of making lending decisions based on political rather than economic criteria Nicholas Lardy explains that this course will inevitably be costly in political terms in part because it will lead for a time to a slower rate of economic growth But the alternative is even less attractive permanently slower growth continued macroeconomic instability an inability to meet the expectations of the international community for the opening of its domestic financial markets and insufficient resources to deal with severe environmental deterioration growing water shortages and a rapidly aging population This timely book also analyzes the new reform initiatives China has launched in the wake of the Asian financial crisis suggests additional steps that must be taken and evaluates the implications for U S policy

Chinese Business Enterprise Rajeswary Ampalavanar Brown,1996 *China's Rural Industry* World Bank,1990 This book provides a comprehensive multi faceted analysis of China s booming rural nonstate collective and private industrial sector Based on a collaboration between Chinese and World Bank researchers the 19 papers compiled here offer detailed national and provincial information from four representative counties 63 townships 122 rural industrial firms and 1 174 workers and address such topics as performance and efficiency ownership and institutional structure employment and wage systems regional structure and related aspects of China s rural industrial sector This study breaks new ground in the scholarly analysis of an increasingly important highly dynamic part of China s economy *From Swords To Plowshares?*

Paul Humes Folta,2019-03-07 It is with great pleasure that I recognize those who helped make this book possible I am indebted to A Doak Barnett Paul H B Godwin and Barry Naughton for their many extremely useful suggestions on the conceptual structure and details of the analysis Others shared many of their resources and contacts among them are Wendy Frieman Albert Kiedet Commander Phil Midland Jonathan Pollack David Shambaugh and Jeffrey Taylor Sammie Choy provided invaluable production assistance with the tables and graphs Barbara Bowersox gave essential administrative support in the initial research and writing stage For funding that made travel to China possible I am grateful to the Johns Hopkins University Paul H Nitze School of Advanced International Studies SAIS Rome Grant and the Shell Oil Company Shell Fellowship Most important of all my wife Eleano provided unfailing encouragement critical insight editorial suggestions and wordprocessing skills

Productive Performance of Chinese Enterprises Y. Wu,1996-04-15 The book is an excellent example of the application of modern econometric techniques to Chinese data some of which was especially collected for the research The results throw new light on aspects of industrial sector reform in China The book deserves wide attention from those interested in the economic reforms in China especially those interested in the implications of the reforms for industrial sector efficiency and productivity growth Christopher Findlay University of Adelaide As the rural township village and private enterprises are becoming more and more significant in the Chinese economy this book focuses on the comparison of the rural non state and state firms in terms of performance The analysis is based on the empirical results from estimating various production functions applied to cross section and panel data Both aggregate and firm specific efficiencies are examined in the case studies exploring potential sources of efficiency differentials such as ownership scale factor intensity location and economic reforms Special attention is also paid to the regional comparison of industrial development and performance The implications of the findings in the book for economic and reform policy are thus highlighted 王 健,1990 王 健,1990

China's Economic Development Lee Pei May,2024-06-21 Through a rigorous examination of China s rise Lee addresses an important question Did China catch up Or more specifically can growth be automatically translated to catching up with the advanced industrialised countries or has it only allowed limited progress if any to be made To answer these queries and the broader question of the possibility of the Global South converging with the Global North four development theories are utilised with competing explanations to uncover the complexity and multifaceted development of China This includes whether China really has a unique developmental model to offer Positioning China within the global economy this book traces its developmental progress over time as well as its progress relative to other countries To understand whether the Chinese political economy is socialist or not Lee moves away from the orthodox definition of socialism and instead examines the official narrative of Socialism with Chinese Characteristics Lastly this book argues that though China is catching up challenges that could potentially block China s progress for a full catch up are to be anticipated A useful resource for students and scholars in the fields of international relations international political economy Chinese studies and

development studies 日本経済研究センター (Japan),1987 *Reform of the Chinese Defense Industries* Paul Humes Folta,1991 **China's Economic Reform, 1978-1988** Manoranjan Dutta,Zhang Zhongli,1991 中国改革研究,1995 **China Facts & Figures Annual** John L. Scherer,1989 **Translations from Red Flag** ,1988 **Research Notes and Studies - Contemporary China Institute, University of London** University of London. Contemporary China Institute,1976 **Treading Different Paths** Georgette Wang,1994 Despite heated debate on the nature of changes brought by the widespread use of information and information technologies few dispute their growing importance in economy and trade More often than not it is the benefit that they promised to bring that attracts policymakers attention For developed nations information technology is regarded as essential in ensuring growth and superiority over other nations while for developing nations they bring new hopes for leapfrogging in economic development and repositioning in the international trade market and power structure The opportunities are undoubtedly rare and highly attractive but the accompanying challenges are also phenomenal to achieve growth as the major source of economic income changes from producing consumer goods to information products To Third World nations there is the added challenge of accelerating development by acquiring and effectively using information and technology resources mostly developed elsewhere This book examines the significance of informatization and the changes that are taking place in Asian nations Studying nine Third World countries it focuses on the way their governments are responding to the information technology challenge and how the structures of the workforce and communication systems are changing because of technology
