This book of Festschrift is an amalgam of papers written by a collage of scholars on various subjects reflecting the multidisciplinary concerns of Professor Herbert Igboanusi. Precisely the contributions are from fields such as sociolinguistics, discourse analysis, language in education, English varieties, literature and cultural linguistics. Irrespective of the orientation and nationality of contributors, the major focus of the papers was on the linguistic issues, experiences and realities in Nigeria in whose frontiers the Festschrift recipient lives and works. It is expected that this volume will be a worthy contribution to linguistic scholarship in Africa and will serve as a reference material to researchers across the world. The Context of

Language Teaching Jack C. Richards, 1985-04-26. This is an important collection of papers by a distinguished personality in the field. Topics covered include second language acquisition, syllabus design, methodology and methods, listening, speaking, vocabulary and grammar. Issues in applied linguistics are summarised and presented with clarity and their practical implications explored, thus making the vital connection between theory and practice in language teaching. Language teachers and students of applied linguistics will find this collection contains a wide range of recent work in linguistics presented in a lucid and highly accessible form. **Stylistics in a Second Language Context** Rubina Kamran, 2009-06. In most institutions the study of second language literary works has become a dead exercise of learning facts, figures and critical opinions about those works. The author feels that the judicious use of approaches suggested in stylistics would help second language students to judge things for themselves in a context not naturally attuned to the underlying assumptions of that literature.

These things would include the use of language thus helping the ESL learner to develop an understanding of the dynamics of the language. **The Oral Method of Teaching Languages** Harold E. Palmer, 1922. Teaching Languages Creatively Philip Hood, 2018-10-03. Teaching Languages Creatively brings together the experience of international primary language experts to explore creative teaching and learning in primary languages. Drawing on the latest research and theory and illustrated with ideas and case studies from real schools, it covers key topics including engaging students in the target language, celebrating bilingualism in the classroom, incorporating technology into modern teaching, integrating language learning across the curriculum, successful transitions, learning languages through singing, storytelling and dance. Ideal for primary trainee teachers, newly qualified teachers and established teachers looking for creative new ideas to enrich the learning experience of their students. Teaching Languages Creatively is an essential guide for inspiring the love of languages that is so vital for young learners. **Teaching Language in Context** Beverly Derewianka, Pauline Jones, 2022.

Teaching Spelling by Column and Context Forms Paul Gordon McKee, 1927. **Australian Journal of French Studies**, 1996. *Language, Context, and Text* Michael Alexander Kirkwood Halliday, Ruqaiya Hasan, 1991. This book reflects the view that the understanding of language lies in the study of texts and that the context is vital to the development and

interpretation of the text itself The approach to language is a functional one in which the different registers of a language are explained through contexts of situation The analysis of texts reveals how each text is unique while the way the text is organized relates closely to the place and value that it has in its social and cultural environment
