Teaching Mathematics To The Learning Disabled:

Teaching Mathematics to Middle School Students with Learning Difficulties Marjorie Montague, Asha K. Jitendra, 2018-03-05 A highly practical resource for special educators and classroom teachers this book provides specific instructional guidance illustrated with vignettes examples and sample lesson plans Every chapter is grounded in research and addresses the nuts and bolts of teaching math to students who are not adequately prepared for the challenging middle school curriculum Presented are a range of methods for helping struggling learners build their understanding of foundational concepts master basic skills and develop self directed problem solving strategies While focusing on classroom instruction the book also includes guidelines for developing high quality middle school mathematics programs and evaluating their effectiveness

Teaching Mathematics to Students with Learning Disabilities Nancy S. Bley, 2019 *Teaching Mathematics to Students with Learning Disabilities* is a professional resource for teachers at the elementary and middle school levels who teach students with learning disabilities Now in its fourth edition this resource has been written with the belief that though they learn differently most students with learning disabilities can master important mathematical concepts and skills can apply them in their day to day lives and will use them to advantage in their future careers This belief has evolved out of our personal experiences with students having learning disabilities that affect mathematics learning and achievement and has molded the way in which our ideas for mathematics instruction have been developed and refined

Teaching Mathematics to Students With Learning Disabilities Francis Obudo, 2008 The purpose of this study was to review and synthesize available literature to draw a comprehensive picture of what is necessary to teach mathematics to students with learning disabilities A systematic search was conducted through 5 computerized databases Academic Search Complete ERIC Education Research Complete and Primary Search

The descriptors used were teaching mathematics to students with learning disabilities and effective mathematics instruction and learning disabilities Only documents that were available in full text from the databases were included The next step in the selection process involved a search through the reference list of the obtained articles This review of literature found that there are four important factors in determining success in mathematics for students with learning disabilities LD They are teacher training teacher attitudes perceptions use of effective strategies use of assistive technologies and the application of an effective curriculum Studies indicated that teachers are inadequately prepared to teach students with learning disabilities especially in math The use of effective strategies is especially important to students with LD Use of strategies is even more important than using drill and practice and mediated instruction strategies The curriculum s that most students with LD are exposed to are ineffective because little emphasis is put on the everyday application of mathematics in their lives A comprehensive approach that addresses teacher deficiencies and closes the gap between research and practice is necessary to address the problems faced by students with LD Well trained teachers will have the knowledge and skills to employ effective strategies use assistive technologies and have positive attitudes towards

their students The implementation of an effective mathematics curriculum that is relevant to students lives and emphasizes problem solving will help students with learning disabilities acquire the mathematics skills necessary for them to be successful

Mathematics Instruction for Students with Learning Disabilities Or Difficulty Learning Mathematics Madhavi Jayanthi, Russell Gersten, Scott Baker, 2008 This guide for teachers is a companion piece to the meta analysis from the Center on Instruction Mathematics Instruction for Students with Learning Disabilities or Difficulty Learning Mathematics A Synthesis of the Intervention Research Based on the findings of this report seven effective instructional practices were identified for teaching mathematics to K 12 students with learning disabilities It describes these practices and incorporating recommendations from The Final Report of The National Mathematics Advisory Panel as well specifies research based recommendations for students with learning disabilities and for students who are experiencing difficulties in learning mathematics but are not identified as having a math learning disability To access The Final Report of The National Mathematics Advisory Panel see ED500486 This publication was created by Instructional Research Group

Teaching Mathematics to Students with Learning Disabilities Ronald S. Horowitz, 1990

Teaching Mathematics to Students with Learning Disabilities and Studying that Instruction Using a Single Subject Design Approach Ani Derderian, 2013 The primary purpose of this study was to examine a largely unexplored area of teaching strategies for students with mathematical learning disabilities The second goal of this study was to find whether the concrete representational abstract multisensory teaching map thinking strategy would increase mathematical achievement in students with mathematical learning disabilities The sample of this study was three students with mathematical learning disabilities from Amman Jordan Students were evaluated with 152 multiplication and division problems This research involved the completion of a single subject design which entails collecting numeric scores through tests Next the data was prepared and organized for graphical analysis In this research a graphical statistical analysis was implemented to address the research question The analysis procedure described trends in data However the researcher used descriptive analysis such as measures of variability the spread of the scores the relative ranking of the scores The results were presented in a graph and in a detailed discussion to address the research question Additional qualitative research was implemented with the three students The researcher conducted the interviews and eight open ended questions were used for coding The researcher then independently recorded the responses with the clarified themes Four themes or categories of open ended responses were identified i e difficulties number organization memorization language skill levels The researcher recorded the data via a variety of methods interviews observation field notes etc coding and categorizing using a variety of clustering and classification schemes attaching concepts to the categories and writing an understanding However the results suggest that more research might be focused a to replicate the study on different mathematical concepts and different subject areas b arrange workshops for teachers and parents to increase their teaching effectiveness level c apply more tools such as case studies interviews and self assessment methods to

assess the effectiveness level of mathematics teaching and learning strategies and engage students with mathematical learning disabilities and consider their impact on the mathematics curriculum's effectiveness

Teaching Elementary Mathematics to Struggling Learners Bradley S. Witzel, Mary E. Little, 2015-12-29 Packed with effective instructional strategies this book explores why certain K-5 students struggle with math and provides a framework for helping these learners succeed. The authors present empirically validated practices for supporting students with disabilities and others experiencing difficulties in specific areas of math including problem solving, early numeracy, whole number operations, fractions, geometry, and algebra. Concrete examples, easy to implement lesson planning ideas, and connections to state standards, in particular the Common Core standards, enhance the book's utility. Also provided is invaluable guidance on planning and delivering multi-tiered instruction and intervention.

Secondary School Mathematics for the Learning Disabled John F. Cawley, 1985

Math Instruction for Students with Learning Difficulties Susan Perry Gurganus, 2021-11-29 This richly updated third edition of *Math Instruction for Students with Learning Difficulties* presents a research-based approach to mathematics instruction designed to build confidence and competence in preservice and inservice PreK-12 teachers. Referencing benchmarks of both the National Council of Teachers of Mathematics and Common Core State Standards for Mathematics, this essential text addresses teacher and student attitudes towards mathematics, as well as language issues, specific mathematics disabilities, prior experiences, and cognitive and metacognitive factors. Chapters on assessment and instruction precede strands that focus on critical concepts. Replete with suggestions for class activities and field extensions, the new edition features current research across topics and an innovative thread throughout chapters and strands: multi-tiered systems of support as they apply to mathematics instruction.
