*Techniques and Applications of Fast Reactions in Solution* W.J. Gettins, E. Wyn-Jones, 2012-12-06 As a result of the pioneering efforts of Eigen de Maeyer Norrish and Porter the kinetics of fast reactions in solution can now be studied using chemical relaxation methods as well as many other fast reactions techniques These methods have been applied successfully in many branches of the natural sciences The simultaneous growth in the number of investigators and the diversity of their research interests has inevitably led to communication problems The purpose of the NATO Advanced Study Institute entitled New Applications of Chemical Relaxation Spectrometry and Other Fast Reaction Methods in Solution was to create a forum so that research scientists working in different areas concerned with fast reactions could interact This meeting was held at the Llandinam Building University College of Wales Aberystwyth from September 10th 20th 1978 In addition to lectures on techniques and theory two days of the NATO Advanced Study Institute were spent discussing the current state of the art in this field This two day meeting was also run under the auspices of the Chemical Society Fast Reactions in Solution Group The papers in this volume are the result of the contributions given in the Aberystwyth meeting We have attempted to make this volume useful for the non expert and a comprehensive introduction to theory as well as the instrumentation used in the studies are discussed in detail
