The Stone Age:

The Stone Age Charles River, 2021-03-28 Includes pictures Includes a bibliography for further reading The early history of Earth covers such vast stretches of time that years centuries and even millennia become virtually meaningless Instead paleontologists and scientists who study geochronology divide time into periods and eras The current view of science is that Earth is around 4.6 billion years old but despite all of the scientific advances made in the past few centuries including an enhanced understanding of Earth's geological past relatively little is known about the planet's early history In a modern study of prehistoric man the twenty-first century mind may struggle with the vast timeline of what we call the Stone Age Most authorities set the pre-human and human occupation of the planet at three to four million years in the past From our perch in today's technological age with its relatively quiet climate charting the journey of ancient humans to preeminence among Earth's life forms is an unsettling effort Should one pursue a history of the physical planet the inquiry will track the agitated natural forces that brought pre-humans onto the evolutionary stage Of the many hominids fighting for life in an ongoing state of planetary upheaval all but one fell to extinction The species that survives today has crossed paths with fallen ancestors who lent us elements of their genetic code As one generation stands on the shoulders of those who came before so it has been with human evolution if a flawed species is fortunate enough to survive the process As the fossil record expands dating the early human is conducted within a constant state of flux Thus the most common period names for phases of early history must do the same A linear chronology of human development defies possibility as tribal relevance moves out and back in all directions Each genetic path requires a return to separate points of origin and the primary archaeological sites must disentangle disparate genetic biographies taken from the same soil or sediment A generally accepted figure for the larger Stone Age featuring the first use of stone tools begins at 3.4 million years in the early Paleolithic Age In a brief interim period of two thousand years following the end of the most recent Ice Age the Mesolithic period serves as a transition to the Neolithic running from 8700 to 2000 BCE More conservative estimates place the span of the Stone Age at 2.5 million years ending around 3000 BCE Modern dating systems are intended to provide approximate conclusions within large epochs not pinpoint calendar dates and shifts of opinion are ongoing Grouped together the Stone Age phases for the tripartite Stone Age are drawn from the Greek words Palaios old and Lithos stone The proliferation of sub-categorizations was designed as a method for studying early humans within a more organized set of chronologies Before such terms came into use in the eighteenth century the best available tracing of early man came from the Greek poet Hesiod His categorization of prehistory followed a scheme through the Golden Age Silver Age Bronze Age Heroic Age and Iron Age Such an arrangement is by all appearances more of a reflection of and salute to human mythology gathered by the threads of emerging and past cultures Something more scientific was required for scholars of the Enlightenment The solution was provided by Christian J. Thomsen a Danish antiquarian who relied on a three-part system of identification In the larger picture of Earth's pre-history his

sequence of Stone Bronze and Iron Ages gained consensus The Stone Age s separation into Paleolithic Mesolithic and Neolithic brought about a clearer dividing line for epochs where humans began to work with metal

Stone Age Yvette LaPierre,2024-12-15 The Stone Age was a time of important human development During this period early human species began making stone tools They lived as hunter gatherers and formed early settlements They created new art forms and technologies paving the way for the next generations The Stone Age explores how people lived during the period and how archaeologists continue to study Stone Age artifacts Easy to read text vivid images and helpful back matter give readers a clear look at this subject Features include a table of contents infographics a glossary additional resources and an index Aligned to Common Core Standards and correlated to state standards Core Library is an imprint of Abdo Publishing a division of ABDO

Trade and Commerce in the Stone Age Daniel Wilson,2026-01-05 Sir Daniel Wilson January 5 1816 August 6 1892 was a Scottish born Canadian archaeologist ethnologist and writer He is famously credited with introducing the word prehistoric into the English language through his earlier work *The Archaeology and Prehistoric Annals of Scotland* 1851 In 1853 Wilson left Scotland to take up the post of Professor of History and English Literature in Toronto Canada In addition to his teaching duties he kept up his interests in Natural history Geology and was very interested in the Ethnography of the indigenous groups that he encountered on his vacation treks In 1861 he was elected a member of the American Antiquarian Society and in 1875 a Fellow of the Royal Society of Edinburgh He also served as president of the Canadian Institute from 1878 1881 as president of University College Toronto from 1880 to 1892 and as the first president of the federated University of Toronto from 1892 Wilson s final masterpiece *The Lost Atlantis and other Ethnographic Studies* published posthumously in 1892 serves as a fascinating compendium of his lifelong intellectual pursuits blending archaeological rigor with ethnographic observation From this seminal work we have selected the study *Trade and Commerce in the Stone Age* In it Wilson challenges the nineteenth century misconception of primitive man as an isolated purely self sufficient being He argues that even in the most remote Stone Age eras both in Europe s Paleolithic past and among the indigenous tribes of the Americas human societies were interconnected by complex networks of exchange and specialized labor
