The Struggle Chinese Version:

The Chinese Political Novel Catherine Vance Yeh, 2020-05-11 The political novel which enjoyed a steep yet short rise to international renown between the 1830s and the 1910s is primarily concerned with the nation's political future. It offers a characterization of the present, a blueprint of the future, and the image of the heroes needed to get there. With the standing it gained during its meteoric rise, the political novel helped elevate the novel altogether to become the leading literary genre of the twentieth century worldwide. Focusing on its adaptation in the Chinese context, Catherine Vance Yeh traces the genre from Disraeli's England through Europe and the United States to East Asia. Her study goes beyond comparative approaches and nation-state and language-centered histories of literature to examine the intrinsic connections among literary works. Through detailed studies, especially of the Chinese exemplars, Yeh explores the tensions characteristic of transcultural processes, the dynamics through which a particular and seemingly local literary genre goes global, the ways in which such a globalized literary genre maintains its core features while assuming local identity and interacting with local audiences and political authorities, and the relationship between the politics of form and the role of politics in literary innovation.

English-Chinese Translation as Conquest and Resistance in the Late Qing 1811-1911 Xiaojia Huang, 2019-05-11 This book examines how translation facilitated the Western conquest of China and how it was in turn employed by the Chinese as a weapon to resist the invasion in the late Qing 1811-1911. It brings out the question on the role of translation as part of the Western conquest of Late Qing China, with special attention drawn to the deceptions and manipulations in the translation of the Sino-foreign unequal treaties signed during 1840-1911. The readers will benefit from the assertion that translation did not remain innocent but rather became intermingled with power abuses in the Chinese milieu as well.

Twentieth-century Chinese Translation Theory Tak-hung Leo Chan, 2004-01-01 Past attempts at writing a history of Chinese translation theory have been bedeviled by a chronological approach which often forces the writer to provide no more than a list of important theories and theorists over the centuries. Or they have stretched out to almost every aspect related to translation in China so that the historical political backdrop that had an influence on translation theorizing turns out to be more important than the theories themselves. In the present book, the author hopes to devote exclusive attention to the ideas themselves. The approach adopted centers around eight key issues that engaged the attention of theorists through the course of the twentieth century in the hope that a historical account will be presented that is not time-bound. On the basis of 38 articles translated into English by teachers and scholars of translation, the author has written four essays discussing the Chinese characteristics of this body of theory. Separately, they focus on the impressionistic, the modern, the postcolonial, and the poststructuralist approaches deployed by leading Chinese theorists from 1901 to 1998. It is hoped that publication of this book will make possible cross-cultural dialogue with translation academics in the West, although the general reader will find much firsthand information on Chinese thinking about translation.
