Vol. 40** Karl Marx, 1975 **Marx's Scientific Dialectics** Paul Paolucci, 2007 This book examines both problems in traditional readings of Marx's texts and how he used several methods of science to inform his dialectical thinking historical materialist research political economic analyses and his communist project A case is made for Marx's continuing methodological relevance **Karl Marx, Frederick Engels: Collected works** , 1983 Theorizing the Dynamics of Social Processes Harry F. Dahms, Lawrence Hazelrigg, 2010-08-18 Intends to assemble a set of essays that invent develop and or demonstrate strategies for theorizing one or several dynamic processes so as to identify illustrate by example and analyze specific problems as well as connect theorizations of process across different disciplines of inquiry Marx's Capital and Hegel's Logic , 2014-04-17 This book provides a wide ranging and in depth reappraisal of the relation between Marx's economic theory in Capital and Hegel's Logic by leading Marxian economists and philosophers from around the world The subjects dealt with include systematic dialectics the New Dialectics materialism vs idealism Marx's inversion of Hegel Hegel's Concept logic universality particularity singularity Hegel's Essence logic essence appearance Marx's levels of abstraction of capital in general and competition and capital as Hegelian Subject The papers in this volume were originally presented at the 22nd annual meeting of the International Symposium on Marxian Theory at Mount Holyoke College in August 2011 The twelve authors are divided between seven economists and five philosophers as is fitting for the interdisciplinary subject of the relation between Marx's economic theory and Hegel's logic Contributors are Chris Arthur Riccardo Bellofiore Roberto Fineschi Gast n Caligaris Igor Hanzel Juan I igo Carrera Mark Meaney Fred Moseley Patrick Murray Geert Reuten Mario Robles Tony Smith and Guido Starosta *Collected Works of Karl Marx and Frederick Engels. Letters 1844-1895. Volume 40* , **Another Marx** Marcello Musto, 2018-05-03 Following the break up of the Soviet Union Marx was regarded as a thinker doomed to oblivion about whom everything had already been said and written However the international economic crisis of 2008 favoured a return to his analysis of capitalism and recently published volumes of the Marx Engels Gesamtausgabe MEGA2 have provided researchers with new texts that underline the gulf between Marx's critical theory and the dogmatism of many twentieth century Marxisms This work reconstructs with great textual and historical rigour but in a form accessible to those encountering Marx for the first time a number of little noted or often misunderstood stages in his intellectual biography The book is divided into three parts The first Intellectual Influences and Early Writings investigates the formation of the young Marx and the composition of his Parisian manuscripts of 1844 The second The Critique of Political Economy focuses on the genesis of Marx's magnum opus beginning with his studies of political economy in the early 1850s and following his labours through to all the preparatory manuscripts for Capital The third Political Militancy presents an insightful history of the International Working Men's

Association and of the role that Marx played in that organization The volume offers a close and innovative examination of Marx's ideas on post-Hegelian philosophy, alienated labour, the materialist conception of history, research methods, the theory of surplus value, working class self-emancipation, political organization and revolutionary theory From this emerges another Marx, a thinker very different from the one depicted by so many of his critics and ostensible disciples **Frederick Engels** V. È Kunina, 1987 Reexamining Engels's Legacy in the 21st Century Kohei Saito, 2021-02-02 While the deepening structural crisis of capitalism in the 21st century has led to a revival of interest in Marx all over the world, Marx's life-long comrade Frederick Engels has largely remained marginalized To commemorate the bicentenary of Engels' birth, this edited collection aims to rectify this gap in academic scholarship by gathering a diverse group of scholars to consider the legacy of Engels' thought and work and critically examine his theoretical relevance in today's world The contributors of this volume provide new stimulating readings of Engels' works to revive some of Engels' key ideas The Legacy of Engels in the 21st Century integrates the most recent discoveries and achievements of Marxian scholarship employing the historical-critical method developed in the Marx-Engels Gesamtausgabe to shed light on the forgotten aspects of Engels' critique of capitalism and vision of postcapitalism **Capitalism and Its Critics** John Cassidy, 2025-05-13 A Financial Times Most Anticipated Book of 2025 A sweeping dramatic history of capitalism as seen through the eyes of its fiercest critics At a time when artificial intelligence, climate change, inequality, trade wars and a right-wing populist backlash to globalization are raising fundamental questions about the economic system, *Capitalism and Its Critics* provides a kaleidoscopic history of global capitalism from the East India Company and Industrial Revolution to the digital revolution But here John Cassidy, a staff writer at *The New Yorker* and a Pulitzer Prize finalist, adopts a bold new approach: he tells the story through the eyes of the system's critics From the English Luddites who rebelled against early factory automation to communists in Germany and Russia in the early twentieth century to the Latin American dependistas, the international Wages for Housework campaign of the 1970s and the modern degrowth movement, the absorbing narrative traverses the globe It visits with familiar names: Smith, Marx, Luxemburg, Keynes, Polanyi, but also focuses on many less familiar figures including Flora Tristan, the French proponent of a universal labor union, Thomas Carlyle, the conservative prophet of the moral depredations of the market, John Hobson, the original theorist of imperialism, J C Kumarappa, the Indian exponent of Gandhian economics, Eric Williams, the Trinidadian author of a famous thesis on slavery and capitalism, Joan Robinson, the Cambridge economist and critic of Keynes, and Samir Amin, the leftist French-Egyptian economist and analyst of globalization Blending rich biography, panoramic history and lively exploration of economic theories, *Capitalism and Its Critics* is true big history that illuminates the deep roots of many of the most urgent issues of our time Karl Marx and Frederick Engels Karl Marx, 1951 **The Great October Socialist Revolution and the Present-day World**, 1987 *Economics in the Shadows of Darwin and Marx* Geoffrey Martin Hodgson, 2006 Darwin and Marx stand out as the supreme theorists of structural change in complex living systems

This collection of essays establishes the importance of Darwinism for economics and other social sciences and compares the Darwinian legacy with that of Marx. It adopts a Darwinian evolutionary approach to the analysis of institutions and routines.
