Sanskrit historians used the tools of their literary tradition to document Muslim governance and later as Muslims became an integral part of Indian cultural and political worlds Indo Muslim rule Truschke demonstrates how this new archive lends insight into formulations and expressions of premodern political social cultural and religious identities By elaborating the languages and identities at play in premodern Sanskrit historical works this book expands our historical and conceptual resources for understanding premodern South Asia Indian intellectual history and the impact of Muslim peoples on non Muslim societies At a time when exclusionary Hindu nationalism which often grounds its claims on fabricated visions of India s premodernity dominates the Indian public sphere The Language of History shows the complexity and diversity of the subcontinent s past

**Time and Language** Ori Sela,Zvi Ben-Dor Benite,Joshua A. Fogel,2023 China s past and present have been in a continuous dialogue throughout history one that is heavily influenced by time and language the temporal orientation and the linguistic apparatus used to express and solidify identity ideas and practices Presenting a host of in depth case studies Time and Language New Sinology and Chinese History argues for and demonstrates the significance of New Sinology by restoring the role of language philology in the research and understanding of how modern China emerged Reading the modern as a careful and ongoing conversation with the past renders the new in a different perspective This volume is a significant step toward a new historical narrative of China s modern history one wherein ruptures can exist in tandem with continuities The collection accentuates the deep connection between language and power one that spans well across China s long past and hence the immense consequences of linguistic related methodology to the comprehension of power structures and identity in China Each of the essays in this volume tackles these issues the methodological and the thematic from a different angle but they all share the Sinological prism of analysis and the basic understanding that a much longer timeframe is required to make sense of Chinese modernity The languages examined are diverse including modern and classical Chinese as well as Manchu and Japanese Taken together they bring a spectrum of linguistic perspectives and hence a spectrum of power relations and identities to the forefront While the essays focus on late Qing and early twentieth century eras they refer often to earlier periods which are necessary to making real sense of later eras The methodological and the thematic do not only converge but also generate a plea for fostering and expanding this approach in current and future studies
