White Minority:

Journal, 1978 *New Methods for Measuring and Analyzing Segregation* Mark Fossett, 2017-09-14 This book is open access under a CC BY NC 2.5 license This book introduces new methods for measuring and analyzing residential segregation It begins by placing all popular segregation indices in the difference of group means framework wherein index scores can be obtained as simple differences of group means on individual level residential attainments scored from area racial composition Drawing on the insight that in this framework index scores are additively determined by individual residential attainments the book shows that the level of segregation in a given city can be equated to the effect of group membership e.g. race on individual residential attainments This unifies separate research traditions in the field by joining the analysis of segregation at the aggregate level with the analysis of residential attainments for individuals Next it shows how segregation analysis can be extended by using multivariate attainment models to assess the impact of group membership i.e. the level of segregation for a city while including controls for other relevant individual characteristics e.g. income education language nativity etc It then illustrates how one can use these models to quantitatively assess the extent to which segregation traces to impacts of group membership on residential attainments versus other factors such as group differences in income The book then shows how micro level attainment models can be used to study macro level variation in segregation specifically by estimating multi level models of individual residential attainments to assess how the effect of group membership i.e. segregation index scores vary with city characteristics Finally the book introduces refined versions of popular indices that are free of the vexing problem of upward bias This improves the quality of segregation measurement directly at the level of individual cases and expanding the number of cases that can be safely included in empirical studies **Shades of Whiteness** Ewan

Kirkland, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2016 This collection examines the varying constructions of racial whiteness across different historical periods cultures and nation states Discussions are included of whiteness as depicted in cinema literature comic books the internet photography and popular television drawing on perspectives and disciplines such as history sociology the law feminism discourse analysis and cultural studies The formation of whiteness is considered across many national contexts including the United States the United Kingdom Austria Italy Sweden South Africa and Ireland The intention of the collection is to illustrate the variability of whiteness as a racial construct the ways in which whiteness is complicated and fragmented by other qualities such as country of origin religion language age and appearance the extent to which whiteness comes to be located in non physical qualities such as education ethnicity class lifestyle and behaviour and the extent to which whiteness establishes and maintains its own internal hierarchies **The American People, Or, The Relations Between the White and the Black** Sir George Campbell, 1889

Feagin, 2023-04-25 Written by a leading scholar of U S racial studies this is the only book yet to comprehensively analyze the societal implications of the U S becoming a white minority nation as demographic changes bring people of color into the majority Joe Feagin traces important societal changes since former president Donald Trump declared white nationalists at Charlottesville among the very fine people on both sides up through recent highly publicized calls by the white far right to challenge supposed white replacement Feagin details a range of U S social political and demographic issues commonly described in terms like the browning of America the coming white minority the minority majority nation and white genocide He thoroughly unpacks these terms with data and comprehensively explores related critical issues accenting and documenting the larger historical societal context the big picture view of four centuries of persisting foundational and systemic racism and the many challenges to it by Americans of color The U S s demographic shift is already driving major divisions between Americans and their political parties It will continue to do so in coming decades What will the racial and other societal structure of the United States look like by the 2050s *Crisis* William Edward Burghardt Du Bois, 1923 A record of the darker races **The Negro in Virginia Politics, 1865-1902** .. Natesan, 1928 [The New Minority](#) Justin Gest, 2016-09-01 It wasn t so long ago that the white working class occupied the middle of British and American societies But today members of the same demographic feeling silenced and ignored by mainstream parties have moved to the political margins In the United States and the United Kingdom economic disenfranchisement nativist sentiments and fear of the unknown among this group have even inspired the creation of new right wing parties and resulted in a remarkable level of support for fringe political candidates most notably Donald Trump Answers to the question of how to rebuild centrist coalitions in both the U S and U K have become increasingly elusive How did a group of people synonymous

with Middle Britain and Middle America drift to the ends of the political spectrum What drives their emerging radicalism And what could possibly lead a group with such enduring numerical power to in many instances consider themselves a minority in the countries they once defined In *The New Minority* Justin Gest speaks to people living in once thriving working class cities Youngstown Ohio and Dagenham England to arrive at a nuanced understanding of their political attitudes and behaviors In this daring and compelling book he makes the case that tension between the vestiges of white working class power and its perceived loss have produced the unique phenomenon of white working class radicalization
