Henry Kingsley

Who Are We Now:

What We Now Know About Race and Ethnicity Michael Banton, 2015-10-01 Attempts of nineteenth century writers to establish race as a biological concept failed after Charles Darwin opened the door to a new world of knowledge Yet this word already had a place in the organization of everyday life and in ordinary English language usage This book explains how the idea of race became so important in the USA generating conceptual confusion that can now be clarified Developing an international approach it reviews references to race racism and ethnicity in sociology anthropology philosophy and comparative politics and identifies promising lines of research that may make it possible to supersede misleading notions of race in the social sciences
