## **Who Will Teach For America:**

*From Teach For America to Teach For China* Sara Lam, 2019-11-13 This book examines the role of Teach For China in addressing educational equity and expanding public participation in education. The author uses the case of Teach For China to explore the broader theme of the mobility of education models between contexts characterized by neoliberalism and those characterized by strong state control. Transnational advocacy networks are increasingly influential in the education policy making process. These networks comprised of entrepreneurs and education corporations, think tanks, philanthropists and government agencies facilitate the global mobility of policy models. It is widely accepted that an education model should not be transplanted from one context to another without careful consideration of how contextual differences might impact the model's effectiveness. The book explores the argument that the same model is not only quantitatively different in terms of effectiveness but that models can play qualitatively different roles in neoliberal and strong state contexts, sometimes moving education reform in opposite directions. The book will appeal to anyone interested in global teacher education reform and equity in education.

*Examining Teach For All* Matthew A.M. Thomas, Emilee Rauschenberger, Katherine Crawford-Garrett, 2020-07-28 Winner 2022 Outstanding Book Award from the Society of Professors of Education Winner 2021 Book Award from the Globalization and Education SIG Comparative and International Education Society. *Examining Teach For All* brings together research focused on Teach For All and its affiliate programmes to explore the organisation's impact on education around the world. Teach For All is an expanding global network of programmes in more than 50 countries that aim to radically transform education systems by recruiting talented graduates to teach for two years in under-resourced schools and developing them into lifelong advocates of reform. The volume offers nuanced insights into the interests and contexts shaping Teach For All and the challenges and possibilities inherent in broader efforts to enact education reform on a global scale. This volume is the first of its kind to present empirical research on the emergence and expansion of Teach For All programmes which replicate and adapt the Teach For America model around the world. The volume traces the network's expansion from its initial launch in 2007 to its growing international presence as chapters present new research from national contexts as diverse as Bangladesh, Lebanon and Spain. Using evidence from a range of perspectives and research methodologies, the chapters collectively highlight the ways in which Teach For All and its affiliate programmes are working to alter educational landscapes worldwide. This book will be of great interest for scholars, educators, post-graduate students and policymakers in the fields of comparative education, teacher education, education leadership and education policy. It paves the way for future critical inquiry into this expanding global network as well as further investigations of educational change around the world.

**Excellence for All** Jack Schneider, 2010 *Excellence For All* American Education Reform 1983-2008 examines the history of school reform in the United States over the past quarter century. Specifically, the work examines an approach to educational change best characterized by the phrase "excellence for all".

an equity focused policy phenomenon uniquely situated for the policymaking context of the late twentieth and early twenty first centuries The idea of promoting excellence for all students united a broad enough coalition to pursue a truly national reform effort and captured the imaginations of leaders in state and local government at philanthropic foundations in colleges and universities and in school districts across the country Led by a corps of self styled educational entrepreneurs aggressively pursuing reforms that they could take to scale the movement sought to remake the American high school piece by piece The dissertation examines this reform movement through the nation s three largest districts New York Chicago and Los Angeles and through three particular change efforts a physical plant reform the small schools movement a personnel reform Teach For America and a curricular reform the Advanced Placement Program The work aims to establish the ways in which this most recent era of school reform represented a departure from previous reform eras strives to explain the movement s broad appeal and ultimately aims to understand its shortcomings by exploring the assumptions underlying the excellence for all approach and the tradeoffs required by it
