Revolution Keijiro Otsuka,Donald F. Larson,2015-11-24 This book explores recent experiences in the effort to bring about a Green Revolution in Sub Saharan Africa SSA The chapters focus on rice and maize which are promising and strategic smallholder crops Significantly we find that an African Rice Revolution has already begun in many irrigated areas using Asian type modern varieties chemical fertilizer and improved management practices Further we find that the same technological package significantly increases the productivity and profitability of rice farming in rainfed areas as well We also find evidence that that management training when done well can boost productivity on smallholder farms This suggests that African governments can accelerate the pace of Africa s Rice Revolution by strengthening extension capacity The story for maize is wholly different where most farmers use local varieties apply little chemical fertilizer and obtain very low yields However in the highly populated highlands of Kenya a number of farmers have adopted high yielding hybrid maize varieties and chemical fertilizer as was the case in the Asian Green Revolution apply manure produced by stall fed cows as was the case during the British Agricultural Revolution and keep improved cows or cross breeds from European cows and local stock as was the case of the Indian White Revolution We conclude that while rice in Africa has benefited from an Asian Green Revolution strategy that emphasizes modern seeds inputs and focused knowledge transfers the success of Africa s Maize Revolution will require a different system approach based on hybrid maize chemical and organic fertilizers and stall fed cross bred cows *Stata Reference Manual* Stata Corporation,1995 **Cajanus** ,2004 **Quality of Service - IWQoS 2001** Lars Wolf,David Hutchison,Ralf Steinmetz,2003-05-15 Welcome to IWQoS2001 in Karlsruhe Quality of Service is a very active research field especially in the networking community Research in this area has been going on for some time with results getting into development and finally reaching the stage of products Trends in research as well as a reality check will be the purpose of this Ninth International Workshop on Quality of Service IWQoS is a very successful series of workshops and has established itself as one of the premier forums for the presentation and discussion of new research and ideas on QoS The importance of this workshop series is also reflected in the large number of excellent submissions Nearly 150 papers from all continents were submitted to the workshop about a fifth of these being short papers The program committee were very pleased with the quality of the submissions and had the difficult task of selecting the relatively small number of papers which
