Consciousness and Mind David Rosenthal,2005-11-17 Consciousness and Mind presents David Rosenthal s influential work on the nature of consciousness Central to that work is Rosenthal s higher order thought theory of consciousness according to which a sensation thought or other mental state is conscious if one has a higher order thought HOT that one is in that state The first four essays develop various aspects of that theory The next three essays present Rosenthal s homomorphism theory of mental qualities and qualitative consciousness and show how that theory fits with and helps sustain the HOT theory A crucial feature of homomorphism theory is that it individuates and taxonomizes mental qualities independently of the way we re conscious of them and indeed independently of our being conscious of them at all So the theory accommodates the qualitative character not only of conscious sensations and perceptions but also of those which fall outside our stream of consciousness Rosenthal argues that because this account of mental qualities makes no appeal to consciousness it enables us to dispel such traditional quandaries as the alleged conceivability of undetectable quality inversion and to disarm various apparent obstacles to explaining qualitative consciousness and understanding its nature Six further essays build on the HOT theory to explain various important features of consciousness among them the complex connections that hold in humans between consciousness and speech the self interpretative aspect of consciousness and the compelling sense we have that consciousness is unified Two of the essays one an extended treatment of homomorphism theory appear here for the first time There is also a substantive introduction which draws out the connections between the essays and highlights their implications *The Bulletin* ,2001 [States of Consciousness](#) Andrzej Kokoszka,2007-10-25 Consciousness has always been a particularly elusive concept and one vigorously argued in the scientific community This

new volume takes on the task of defining normal and altered consciousness in their most relevant clinical terms In States of Consciousness Andrzej Kokoszka expands on the pioneering work of J H Jackson offering contemporary models for studying consciousness as it applies to both pathology and normal altered states e g relaxation sleep meditation and hypnosis He makes clear distinctions between the neuroscientific and psychiatric components of consciousness at the same time his theories are rooted firmly in the biopsychosocial approach Highlights of the coverage Historical overview of studies of consciousness and its altered states Evolutionary dynamic model of consciousness and information processing based on the structure and principles of cell behavior Comparison of altered states of consciousness in healthy persons and patients with schizophrenia New perspectives on the role of consciousness in pathology Case illustration of altered states in a patient with Posttraumatic Stress Disorder integrating neurobiological cognitive behavioral and psychodynamic data Applications of the model in clinical practice States of Consciousness lends itself to theoretical and practical research and classroom use It is relevant to a range of scientists and practitioners in cognition clinical psychology social psychology and neuropsychology The book s scope and the author s attention to detail make it a work of great versatility much like consciousness itself

Mental State Defences in Criminal Law Steven Yannoulidis,2016-04-22 By defining appropriate boundaries for the defence of insanity and the doctrine of automatism this book presents a consistent and principled approach to the reform of mental state defences In particular by undertaking an interdisciplinary analysis of the various factors that inform these defences the book concludes with several practical and robust reform proposals There are three objectives that underpin the suggested reform proposals First to ensure that an accused will be able to raise a defence of insanity for involuntary conduct arising from mental disorder even where he or she is aware of the nature and quality of such conduct Second to provide principled means by which to establish the criminal responsibility of an accused for conduct performed in a state of drug induced psychosis Third to ensure that criminal conduct arising from a state of impaired consciousness does not automatically result in the outright acquittal of an accused In articulating the competing demands that must be balanced in order to secure a principled approach to the reform of mental state defences the book will be of relevance to all common law countries
