With an index map** John Murray (Firm),1875     **Western Technology and China's Industrial Development** Hsien-ch'un Wang,2022-04-22 This book explores how steam engine technology was transferred into nineteenth century China in the second half of the nineteenth century by focusing on the transmission of knowledge and skills It takes on the long term problem in historiography that puts too much emphasis on politics but ignores the techno scientific and institutional requirements for launching such an endeavor It examines how translations broke linguistic and conceptual barriers and brought new a understanding of heat to the Chinese readership It also explores how the Fuzhou Navy Yard s shipbuilding and training program trained China s first generation of shipbuilding workers and engineers It argues that conservatism against technology was not to blame for China s slow development in steamship building Rather it was government officials failure to realize the scale of institutional and techno scientific changes required in importing and disperse new knowledge and skills     **Nature's Evil** Alexander Etkind,2021-08-12 This bold and wide ranging book views the history of humankind through the prism of natural resources how we acquire them use them value them trade them exploit them History needs a cast of characters and in this story the leading actors are peat and hemp grain and iron fur and oil each with its own tale to tell The uneven spread of available resources was the prime mover for trade which in turn led to the accumulation of wealth the growth of inequality and the proliferation of evil Different sorts of raw material have different political implications and give rise to different social institutions When a country switches its reliance from one commodity to another this often leads to wars and revolutions But none of these crises go to waste they all lead to dramatic changes in the relations between matter labour and the state Our world is the result of a fragile pact between people and nature As we stand on the verge of climate catastrophe nature has joined us in our struggle to distinguish between good and evil And since we have failed to change the world now is the moment to understand how it works     **A Handbook for Travellers on the Continent: Part I.
