Environmental Education Center, 1974 *Field Trips in Environmental Education* Martin Storksdieck, 2011-01-01

Hauptbeschreibung Field trips are a popular method for introducing students to concepts ideas and experiences that cannot be provided in a classroom environment This is particularly true for trans disciplinary areas of teaching and learning such as science or environmental education While field trips are generally viewed by educators as beneficial to teaching and learning and by students as a cherished alternative to classroom instruction educational research paints a more complex picture At a time when school systems demand proof of the educational value of field trips large gaps often Environmental Education in a Climate of Reform Sylvia Christine Almeida, 2015-10-29 India is grappling with serious environmental issues that have been largely sparked by its galloping economy As a measure of its seriousness to reduce the environmental impacts it has spearheaded numerous policy initiatives One of the major thrusts of the proposed initiatives to curb environmental degradation has been to create an informed and well educated citizenry The federal mandates have triggered new curriculum policies and the compulsory teaching of environmental and sustainability education at all levels in all education institutions This volume examines the policy practice conundrum It looks at how national and international policy reforms reach practitioners in this case teacher educators Furthermore it unravels how teacher educators understand environmental education the ways in which they negotiate its demands on their busy schedules what helps them in determining relevant issues within this and finally how they implement these policies in their everyday practices It is evident from this book that while there have been some really well meaning development of policies their impact on teacher educators practice and therefore student teachers learning about Environmental Education is limited The study showed that while these teacher educators had a clear understanding of the environment and saw the need importance of incorporating Environmental Education in their daily practices they had very little scope to do so There were numerous factors that constrained implementation The book provides inputs on global policy practice gaps It offers valuable insights to a global audience grappling with understanding the ways in which environmental education policies are put into practice in emerging

economies like India The final argument is thesis that while policy reforms are a step in the right direction they need to be backed up with strong implementation systems in order to be successful div

The Imperative for Environmental Education in Teacher Training David Oakes, 1997 *Teaching for a Sustainable World* John Fien, 1993

This document is a curriculum for preservice teachers that attempts to illustrate how environmental education and development education are related and to provide practical assistance for teacher educators who would like to include these important fields in their programs. The project provides a focus for discussion of environmental and development education issues in teacher education in Australia. The particular audience for this project is preservice teacher education. However the workshop modules are adapted easily for the continuing or inservice professional development of teachers. The workshops provided in this program may be used in three major ways: 1 the materials may be used as the basis for a linked program of professional and curriculum development; 2 the workshop materials may be infused with or without local adaptations into a range of courses subjects or units in a teacher education course; and 3 the workshops may be used as a set for a core or elective course in development and environmental education. Three workshops were written to be introductory. These workshops provide an introduction to environmental education an introduction to development education and a way of seeing the linkages and similarities between environmental and development education. These three workshops may be considered as a hub while the remaining 15 workshops are spokes that address particular themes and specialties in environmental and development education. These other themes discuss futures science educational resources sustainability population and waste management among others. DK
