Technique Et Civilisation:

Technics and Civilization Lewis Mumford,1934 **Technics and Civilization** Lewis Mumford,1965 **Techniques, Technology and Civilization** Marcel Mauss,2006-03

It seems that Mauss's fame has grown in inverse proportion to knowledge of his actual writings. It should therefore be a matter of celebration that his occasional writings on techniques and technology have been published in English when we look more closely at what Mauss did and did not do his iconic status may be somewhat tarnished. But his general example still has the power to inspire and maybe that is what counts. JRAI

The appearance of these two essays in English for the first time attests to the continuing interest in Marcel Mauss and the fact that re-readings of his work still provide not only fertile ground for new interpretations of the Durkheimian school in general but also a source of inspiration for scholars approaching Mauss as a remarkably contemporary voice still speaking in many ways to current issues in sociology and anthropology. Journal of the Royal Anthropological Institute

Marcel Mauss's writings on techniques and technology are at the forefront of an important anthropological and sociological research tradition and they also highlight the theoretical and ideological challenges surrounding this field of study. A selection of Mauss's texts including his major statements on methodology on body techniques on practical reason on nation and civilisation on progress and so forth are here translated and presented together for the first time with a discussion of their context impact and implications. This book will interest scholars and students dealing with the French sociological tradition and also more generally those concerned with technology and material culture studies in archaeological anthropological or contemporary settings. Nathan Schlanger coordinates the AREA project Archives of European Archaeology at the INHA Paris. He has published on prehistoric archaeology on the technological contributions of Mauss and Leroi Gourhan and on the history of archaeology in colonial African contexts.

Science and Civilisation in China Joseph Needham,1974 History of Techniques Guillaume Carnino,Xavier Guchet,2026-01-15

Over the past thirty years the history of technology has been so extensively renewed that many once canonical narratives have been invalidated. This collective work takes account of several of these major recompositions: ancient periods were never eras of technical stagnation; techniques are not diffused but interpenetrate and reinvent themselves as they travel; invention is not an individual epiphany but a gradual and often collective process far from neutral; the material is endowed with its own agentivity; the notions of capitalism gender and the environment are fertile contributions to the history of techniques and have served to invalidate many naiveties. These recent works have put an end to the discontinuous vision of a history made up of straightforward technical ruptures in favor of more complex descriptions that provide a better grasp of the real dynamics of today's world.

Part 2, Agriculture Joseph Needham, Francesca Bray, 1984-04-19 This second part of the sixth volume of Joseph Needham's great enterprise is an account of the technological history of agriculture with major sections devoted to field systems implements and techniques sowing harvesting storing and crop systems what has grown and where and how crops rotated

Technics and Civilization Lewis Mumford, 1963 Traces the evolution of the machine and describes its effects on man and his environment *The Material Subject* Urmila Mohan, Laurence Douny, 2020-11-01 The Material Subject emphasises how bodily and material cultures combine to make and transform subjects dynamically The book is based on the French *Matre Penser* MaP school of thought which draws upon the ideas of Mauss Schiller Foucault and Bourdieu among others to enhance the anthropological study of embodiment practices techniques materiality and power Through theoretical sophistication and empirical field research case studies from Europe Africa and Asia bring MaP's ideas into dialogue with other strands of material culture studies in the English speaking world These studies mediate different scales of engagement through a sensori motor affective and cognitive focus on practices of making and doing Examples range from the precarity of professional divers in French public works to the gendered subjectivity of female carpet weavers in Morocco from the ways Swiss watchmakers transmit craft knowledge to how Hindu devotees in India make efficacious use of altars and from the enskilment of Paiwan indigenous people in Taiwan to the prestige of women's wild silk wrappers in Burkina Faso The chapters are organised according to domains of practice defined as matter of work and technology heritage politics religion and knowledge Scholars and students with an interest in material culture will gain valuable access to global research rooted in a specific intellectual tradition

Sport and Violence: Rethinking Elias Dominique Bodin, Luc Robène, 2018-07-26 The aim of this book in discussing Elias's theory is not to refute it Tendentiously the theory works with its weaknesses and strong points and it has been enriched by a number of authors over time The objective of this volume is to discuss the blind spots and more simply what is too often taken for granted namely the obvious pacifying effect of sports and or produced by sports This analysis has been guided by two perspectives the sociological one which questions the naturalization of sport which is also the naturalization of the wildlings which have to be civilized and the other which comes from philosophical anthropology and attempts to comprehend the long term characteristics of this union or disunion of sport and violence History of Techniques: Techniques and civilizations Bertrand Gille, 1986 *Civilisations*, 1971 *Eurasia septentrionalis antiqua* Uno Taavi Sirelius, Arne Michael Tallgren, 1930 Free University Quarterly, 1961 Review - Fernand Braudel Center for the Study of Economies, Historical Systems, and Civilizations Fernand Braudel Center for the Study of Economies,
