The Stone Circle:

A Guide to the Stone Circles of Britain, Ireland and Brittany Aubrey Burl, 2005-01-01 This practical and knowledgeable guidebook deals comprehensively with the stone circles of Britain and Ireland and with the cromlechs and megalithic horseshoes of Brittany This new edition includes a section on Druidical circles romantic creations of the late eighteenth and early nineteenth centuries This book is not only an elegant and practical guide it is also the best single volume study of this extraordinary phenomenon embracing 500 monuments from Shetland to Brittany Confident erudite pleasurable this volume can be recommended as travel guide archaeology literature and sheer good company Ian Sheperd British Archaeology This is a wonderful book and is a must for anyone remotely interested in things megalithic Paul Walsh Archaeology Ireland

The Stone Circles of Britain, Ireland, and Brittany Aubrey Burl, 2000-01-01 The spectacular stone circles of western Europe some nearly 6000 years old have intrigued viewers through the ages This beautiful book about these megalithic rings explores their ancestry methods of construction and eventual desertion A substantially revised version of Aubrey Burl s highly praised work *The Stone Circles of the British Isles* it offers new insights into the purpose of stone circles It also provides a new interpretation of Stonehenge and of Callanish in Scotland the first overview of the cromlechs in Brittany a discussion of the problems of archaeoastronomy as related to stone circles a greatly expanded Gazetteer and an up to date list of radiocarbon dates and recent excavations

Building the Great Stone Circles of the North Colin Richards, 2013-11-30 Of all prehistoric monuments few are more emotive than the great stone circles that were built throughout Britain and Ireland From the tall elegant pointed monoliths of the Stones of Stenness to the grandeur of Stonehenge and the sarsen blocks at Avebury circles of stone exert a magnetic fascination to those who venture into their sphere In Britain today more people visit these structures than any other form of prehistoric monument and visitors stand in awe at their scale and question how and why they were erected *Building the Great Stone Circles of the North* looks at the enigmatic stone structures of Scotland and investigates the background of their construction and their cultural significance

The Use and reuse of stone circles Courtney Nimura, Richard Bradley, 2016-09-30 The study of stone circles has long played a major role in British and Irish archaeology and for Scotland most attention has been focused on the large monuments of Orkney and the Western Isles Several decades of fieldwork have shown how these major structures are likely to be of early date and recognized that that smaller settings of monoliths had a more extended history Many of the structures in Northern Britain were reused during the later Bronze Age the Iron Age and the early medieval period A series of problems demand further investigation including when were the last stone circles built How did they differ from earlier constructions How were they related to henge monuments especially those of Bronze Age date How frequently were these places reused and did this secondary activity change the character of those sites This major new assessment first presents the results of fieldwork undertaken at the Scottish recumbent stone circle of Hillhead the stone circles of Waulkmill and Croftmoraig the

stone circle and henge at Hill of Tuach at Kintore and the small ring cairn at Laikenbuie in Inverness shire Part 2 brings together the results of these five projects and puts forward a chronology for the construction and primary use of stone circles particularly the Chalcolithic and Bronze Age examples It considers the reuse of stone circles long after they were built and discusses four neighboring stone circles in Aberdeenshire which display both similarities and contrasts in their architecture use of raw materials associated artefacts and structural sequences Finally a reassessment and reinterpretation of Croftmoraig and its sequence is presented the new interpretation drawing attention to ways of thinking about these monuments which have still to fulfill their potential In the Stone Circle Elizabeth Cody Kimmel,1998 While spending the summer in an old stone house in Wales fourteen year old Cristyn comes to terms with the death of her mother while satisfying the request of a thirteenth century princess **The Stones of Stonehenge** Edward Herbert Stone,1924

Archaeological Research on the Societies of Late Prehistoric Xinjiang, Vol 2 Guo Wu,2022-11-23 This book presents cutting edge archaeological materials from Xinjiang from the Bronze Age to the early Iron Age Through a systematic topological study of major archaeological cemeteries and sites it establishes chronologies and cultural sequences for three main regions in Xinjiang namely the circum Eastern Tianshan region the circum Dzungarian Basin region and the circum Tarim Basin region It also discusses the origins and local variants of prehistoric archaeological cultures in these regions and the mutual relationships between them and neighboring cultures By doing so the book offers a panoramic view of the socio cultural changes that took place in prehistoric Xinjiang from pastoral agricultural societies to the mobile nomadic pastoralist states in the steppe regions and the agricultural states of the oasis making it a must read for researchers and general readers who are interested in the archaeology of Xinjiang The Prehistoric Burial Sites of Northern Ireland Harry Welsh,June Welsh,2014-07-28 Much has been written about the history of Northern Ireland but less well known is its wealth of prehistoric sites particularly burial sites from which most of our knowledge of the early inhabitants of this country has been obtained **Report and Inventory of Monuments and Constructions** Great Britain. Commissions. Ancient and Historical Monuments of Scotland,1920 *A Stone Circle* ,1997 The Gods' Machines Wun Chok Bong,2008-05-27 Based on the author s decipherment of prehistoric carvings and the application of mathematical measurements The Gods Machines shows how unknown phenomena from Angkor Wat to Stonehenge to crop circles are actually powerhouses built by an advanced extraterrestrial civilization for tapping electromagnetic energy The book traces the development of that civilization on Earth over 5 000 years revealing how all these structures are aligned according to a universal formula an angle of 135 degrees at which Earth s energy has been tapped by the alien creators of these monuments These fascinating theories not only explain our distant past but also open the door to a future of power technology and space travel Megalithic sites such as Newgrange and Stonehenge are constructed with quartz and iron rich stones with electrical conduction properties minerals also found atop Aztec temple and inside crop circles These stones according to the author served as dry cell batteries when

heated and stressed and supplied energy to the builders traveling vehicles Most interestingly the author has tested his theory on today s crop circles The Gods Machines is certain to stimulate debate among readers interested in alternative history ancient civilization and extraterrestrial intelligence
