The Structure of Art The Open The Open Courses Library, 2019-12-13 The Structure of Art Introduction to Art When we look at the art objects that people have made over the centuries and around the world we find they share some basic elements They exist they have substance they are either flat or in the round they use or do not use perspective line shape mass value color texture and so on Over time both artists and art critics have developed a set of terms to describe art objects and their design In this book we will develop an art specific vocabulary to use in identifying different types of art forms discerning the materials and processes used to create them understanding how the elements and principles of design are used by artists and recognizing how they convey meaning in visual art Chapter Outline Art Specific Vocabulary Art Forms Form And Composition The Open Courses Library introduces you to the best Open Source Courses      The Structure of Art Robert Thirlwell, South Australian School of Art, 1980      **The Structure of Art** Kenneth Robert Donow, 1900      The Theory and Practice of Modern Framed Structures, Designed for the Use of Schools and for Engineers in Professional Practice: Statically indeterminate structures and secondary stresses John Butler Johnson, Charles Walter Bryan, Frederick Eugene Turneure, 1910      Mindprint, the subconscious art code Edmond Furter, 2014-04-11 Visual archetypes are the DNA of culture In artefacts and artworks where archaeo astronomers see ancient star maps archaeologists see cultural traditions and anthropologists see initiation secrets appear a standard sequence of types on an axial grid Structural archaeology uses constellations as myth maps to find the structure of our perception All inspired artists in the Stone Ice Bronze and Iron Ages Babylonians Egyptians Chinese Celts Mayans Vikings and moderns subconsciously express mindprint our eternal artefact The sixteen clusters of attributes are demonstrated in 200 examples of famous art and rock art works from every continent and culture Archetypes are statistically proven and their camouflage is explained in terms of archaeology anthropology art history psychology philosophy archaeo astronomy esoterica and spirituality Readers will never look at art artists or culture as a cumulative learned or evolved craft again      *Arts and Power* Lisa Gaupp, Alenka Barber-Kersovan, Volker Kirchberg, 2022-09-05 The focus on concepts of power and domination in societal structures has characterized sociology since its beginnings Max Weber s definition of power as imposing one s will on others is still relevant to explaining processes in the arts whether their production imagination communication distribution critique or consumption Domination in the arts is exercised by internal and external rulers through institutionalized social structures and through beliefs about their legitimacy achieved by defining and shaping art tastes The complexity of how the arts relate to power arises from the complexity of the policies of artistic production distribution and consumption policies which serve to facilitate or hinder an aesthetic object from reaching its intended public Curators critics and collectors employ a variety of forms of cultural and

artistic communication to mirror and shape the dominant social economic and political conditions Arts and Power Policies in and by the Arts brings together diverse voices who position the societal functions of art in fields of domination and power of structure and agency whether they are used to impose hegemonic totalitarian or unjust goals or to pursue social purposes fostering equal rights and grassroots democracy The contributions in this volume are exploratory steps towards what we believe can be a more systematic empirically and theoretically founded sociological debate on the arts and power And they are an invitation to take further steps
