Greener Products Al Iannuzzi, 2024-08-21 Sustainability and its competitive advantage are the goals of every company and any brand that wants to stay successful in the marketplace. Customers also gravitate to brands that manage sustainability issues well. Greener Products: The Making and Marketing of Sustainable Brands written by a renowned sustainability expert continues to address the latest developments in the extremely fast moving field of sustainability. The third edition is thoroughly updated, introduces new case studies, and includes a new chapter on green marketing. With over 40 case studies, it explores the best practices of leading global companies and helps readers learn what it is that makes them successful. New in the Third Edition: Presents in a practical way the best practices of sustainable brands in a global economy; Addresses the most current sustainability topics like circular economy, plastics in the environment, biodiversity, climate change, green chemistry, etc.; Includes current marketing information on consumer trends to purchase greener products; Incorporates the latest pressures on companies to address sustainability, retailer programs, business to business expectations, ESG raters, rankers, and stock funds; Covers best practices of companies from various industries on how to make and market greener products; Provides current tools for making products more sustainable and methods on how to market sustainable improvements; Includes lecture slides available upon request for use in the classroom. This book serves senior undergraduate and graduate students in programs focused on sustainability as well as academics and corporate sustainability leaders. The previous versions have been used to teach courses on sustainability, product improvement, introduction to sustainability, green marketing, and sustainability and sustainability policy. Any university that teaches a course on sustainability and any company or individual interested in making and marketing more sustainable products would benefit from the new edition of this book.

Environment-Friendly Products—Adapt Green Now Dr. Aparna P. Goyal, 2017-12-14 Excessive pollution has provoked the nature and the nature starts behaving in unnatural ways in form of global warming versus global cooling, heavy rains versus draught, and other natural calamities like frequent earthquakes and tsunamis, cyclones, epidemics, and so forth. Economic growth via production and consumption threatens peaceful life of human beings on the earth. Environment friendly eco green marketing is an attempt to protect consumer welfare and environment, the nature, through production, consumption, and disposal of eco friendly products. Basically, green marketing is concerned with three aspects: 1) promotion of production and consummation of pure quality products; 2) fair and just dealing with customers and society; and 3) protection of ecological environment. Thus, green marketing is a marketing philosophy that promotes production and selling of pure eco friendly products with protection of ecological balance. Green marketing involves multiple activities: Green marketing encourages production of pure products by pure technology, conservation of energy, preservation of environment, minimum use of natural resources, and more use of natural foods instead of processed foods. Efforts of people, social organizations, firms, and governments in this regard can be said as green marketing efforts. Green marketing raises the voice against production

consumption and or disposal of such products that harm consumers the society and the environment anyway It is necessary that businessmen and users should refrain from harmful products
