The Use of the Voice in Reading and Speaking Francis Thayer Russell,1883 **Paul Robeson's Voices** Grant

Olwage,2023-11-20 Paul Robeson s Voices is a meditation on Robeson s singing a study of the artist s life in song Music historian Grant Olwage examines Robeson s voice as it exists in two broad and intersecting domains as sound object and sounding gesture specifically how it was fashioned in the contexts of singing practices in recital concert and recorded performance and as subject of identification Olwage asks how does the voice encapsulate modes of subjectivity of being Combining deep archival research with musicological theory this book is a study of voice as central to Robeson s sense of self and his politics Paul Robeson s Voices charts the dialectal process of Robeson s vocal and self discovery documenting some of the ways Robeson s practice revised the traditions of concert singing in the first half of the twentieth century and how his voice manifested as resistance *Atalanta* ,1897 Theories of the Soundtrack James Buhler,2018-10-03 A theory of the soundtrack is concerned with what belongs to the soundtrack how a soundtrack is effectively organized how its status in a multimedia object affects the nature of the object the tools available for its analysis and the interpretive regime that the theory mandates for determining the meaning sense and structure that sound and music bring to film and other audiovisual media Beyond that a theory may also delineate the range of possible uses of sound and music classify the types of relations that films have used for image and sound identify the central problems and reflect on and describe effective uses of sound in film This book summarizes and critiques major theories of the soundtrack from roughly 1929 until today Rather than providing an exhaustive historical survey it sketches out the range of theoretical approaches that have been applied to the soundtrack since the commercial introduction of the sound film The basic theoretical framework of each approach is presented taking into account the explicit and implicit claims about the soundtrack and its relation to other theories The organization is both chronological and topical the former in that the chapters move steadily from early film theory through models of the classical system to more recent critical theories the latter in that the chapters highlight central issues for each generation the problem of film itself then of image and sound of adequate analytical descriptive models and finally of critical interpretative models **Cognitive-behavioural Therapy with Delusions and Hallucinations** Hazel E. Nelson,2005 Written in a highly accessible style this book gives detailed practical guidance providing the reader with a range of strategies and techniques set within a clear structured framework Voice Power Renée Grant-Williams,2002 A celebrity voice coach
