

TALKING WITH VOICES

Greater Manchester
Mental Health
NHS Foundation Trust

Have you heard voices for at least a year and sometimes find them hard to cope with?

Have you received a diagnosis of schizophrenia or psychosis and are not currently receiving psychological therapy?

Are you aged 18 or over?

Would you be interested in an approach where a therapist engages directly with your voices?

Talking With Voices (TwV) is a new form of therapy to help people cope with the voices they hear. It involves a therapist 'talking' to your voice by asking it questions. You can then listen to the responses and repeat them out loud.

Over time, the therapist aims to understand how the voices may relate to certain problems in your life and works to support you and your voices to develop a more peaceful, positive relationship.

If you think this something that could be helpful for you and your voices and you answered yes to the questions opposite, then you may be able to take part in a new research trial looking at **TwV** compared to standard mental healthcare.

Voice Of Hearing:

Can't You Hear Them? Simon McCarthy-Jones, 2017-04-21 What's wrong with you? People who hear voices will often hear this alienating question and are treated ineffectively with anti-psychotic drugs. Recounting the stories of voice hearers, this book suggests that we should instead ask "What happened to you?" and offers an alternative approach to auditory hallucinations.

Hearing Voices Simon McCarthy-Jones, 2012-04-05 The meanings and causes of hearing voices that others cannot hear (auditory verbal hallucinations) in psychiatric parlance have been debated for thousands of years. Voice hearing has been both revered and condemned, understood as a symptom of disease as well as a source of otherworldly communication. Those hearing voices have been viewed as mystics, potential psychiatric patients, or simply just people with unusual experiences and have been beatified, esteemed, or accepted, as well as drugged, burnt, or gassed. This book travels from voice hearing in the ancient world through to contemporary experience, examining how power, politics, gender, medicine, and religion have shaped the meaning of hearing voices. Who hears voices today, what these voices are like, and their potential impact are comprehensively examined. Cutting-edge neuroscience is integrated with current psychological theories to consider what may cause voices and the future of research in voice hearing is explored.

Visions and Voice-Hearing in Medieval and Early Modern Contexts Hilary Powell, Corinne Saunders, 2020-12-11 This book examines how the experiences of hearing voices and seeing visions were understood within the cultural, literary, and intellectual contexts of the medieval and early modern periods. In the Middle Ages, these experiences were interpreted according to frameworks that could credit visionaries or voice hearers with spiritual knowledge and allow them to inhabit social roles that were as much desired as feared. Voice hearing and visionary experience offered powerful creative possibilities in imaginative literature and were often central to the writing of inner spiritual lives. Ideas about such experience were taken up and reshaped in response to the cultural shifts of the early modern period. These essays, which consider the period 1100 to 1700, offer diverse new insights into a complex, controversial, and contested category of human experience, exploring literary and spiritual works as illuminated by scientific and medical writings, natural philosophy, and theology, and the visual arts. In extending and challenging contemporary bio-medical perspectives through the insights and methodologies of the arts and humanities, the volume offers a timely intervention within the wider project of the medical humanities. Chapters 2 and 5 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Hearing Voices John Watkins, 2008 The issues surrounding mental health in Australia have for the past year created a great deal of exposure in the media.
